Significance: Agency Priority

Legal Authority: 23 USC 315; 49 USC 3102; 49 USC 504; 49 USC app 2505

CFR Citation: 49 CFR 381

Legal Deadline: None

Abstract: On November 21, 1988, the FHWA issued a final rule (53 FR 47134) requiring motor carriers to have an anti-drug program. This program includes testing drivers who operate commercial motor vehicles (CMV's) in interstate commerce for drug use. The final rule set forth the classes of controlled substances, the types of tests to be conducted, and through reference to 49 CFR 40, Procedures for Transportation Workplace Drug Testing Programs, procedures for testing and reporting of the test results. On November 6, 1989, the FHWA published a notice (54 FR 46616) that stated the FHWA policy regarding implementation of certain provisions of the anti-drug program in view of a preliminary injunction issued on January 6, 1989, enjoining the FHWA from implementing random and certain mandatory post-accident testing of commercial motor vehicle (CMV) drivers. The notice also clarified the types of testing that must be implemented by December 21, 1989. Implementation of the random and certain mandatory post-accident testing provisions are now required, as the court's injunction has been dissolved.

The initial Final Rule published on 11/21/88 was considered major under EO 12291. It has been determined that the regulatory actions issued 11/06/89 and 02/01/90 regarding the drug testing program were only clarifying the initial rule. Therefore, they were considered nonmajor and nonsignificant. A final rule published on 12/27/89 at 54 FR 53294 deferred the compliance date to 1/2/92 for carriers domiciled in a foreign country; a further delay of compliance date is being considered. Final action herein is considered significant because of substantial public interest.

2489. RULEMAKING TO DELETE "DUE CARE" PROVISIONS FROM THE OCCUPANT CRASH PROTECTION STANDARD

Significance: Nonsignificant

Legal Authority: 15 USC 1392; 15 USC 1401

CFR Citation: 49 CFR 571.208

Legal Deadline: None

Abstract: In 1986, NHTSA added a provision to Standard No. 208, Occupant Crash Protection, allowing vehicles that fail one or more of the injury criteria in the standard to still be considered as complying with the standard if the manufacturer could show it had exercised "due care" in the design and construction of the vehicle. The Motor Vehicle Safety Act requires all safety standards to be expressed in "objective terms." Further, the courts have held that compliance with safety standards must be determined by objective measurements and without recourse to any subjective determinations. The inherently subjective nature of a "due care" determination precludes the use of that concept as an aspect of compliance with the safety standards. Therefore, the "due care" provisions would be proposed to be deleted from the crash protection standard.

Abstract: The agency has granted a petition from the United States Army Tank Automotive Command (ATAC), to amend Federal Motor Vehicle Safety Standard No. 106, Brake Hoses, and Federal Motor Vehicle Safety Standard No. 116, Brake Fluids. ATAC requested that Standard No. 106 be amended to require brake hose compatibility with a fluid that includes DOT 5 characteristics and that Standard No. 116 be amended to require compatibility of DOT 3, DOT 4, and DOT 5 brake fluids with elastomeric seals and cups internal to hydraulic brake system master and wheel cylinders. The agency believes that the changes suggested by ATAC warrant further consideration.

Significance: Agency Priority

Legal Authority: 15 USC 1392 National Traffic & Motor Vehicle Safety Act of 1966; 15 USC 1407 National Traffic & Motor Vehicle Safety Act of 1966

CFR Citation: 49 CFR 571.121; 49 CFR 571.105

Legal Deadline: None

Abstract: Proposed action would establish a new brake standard for all trucks, buses, and trailers with a Gross Vehicle Weight Rating (GVWR) over 10,000 pounds. This standard would replace Standard No. 121, Air Brake Systems, and that portion of Standard No. 105, Hydraulic Brake Systems, that applies to vehicles with a GVWR over 10,000 pounds. It would also establish new requirements for heavy trailers having other than air-actuated brakes. In developing the standard, the agency will consider compatibility with international regulations. Research programs in support of this new standard and possible future upgradings of the standard will investigate such long-term advanced braking system concepts as antilock systems, automatic brake adjustors, load-sensing proportioning values, air driers, and retarders for heavy trucks, buses, and trailers. This rule is considered significant because of the level of public and congressional interest. It is

necessary to prevent and reduce the severity of accidents involving heavy vehicles by providing increased accident avoidance capability.

Abstract: This action involves requirements for light trucks, vans, and multipurpose passenger vehicles, to reduce the risk of fatalities and injuries where side protection of the vehicle is a relevant factor. A final rule extended the quasi-static test requirements for these vehicles with a GVWR of 10,000 pounds or less. An SNPRM is being considered to cover three issues not

addressed in the NPRM of 12/22/89. The issues are 1) testing of double cargo doors used in full size vans or other vehicles, if any; 2) the position for loading cylinder when the entire lower edge of the door is not parallel to the sill; and 3) the position of the loading cylinder when the door does not have a window. These rulemaking actions are considered significant because of the public safety implications.

Abstract: Standard No. 301, Fuel System Integrity, has as its purpose the reduction of deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes. Although vehicles using methanol or ethanol are covered under this standard, there are certain properties of these fuels which are different than those of gasoline or diesel fuel, and are not addressed under this standard. The purpose of this notice is to solicit comments to help NHTSA determine whether specific rulemaking is needed relative to the fuel system integrity of vehicles using methanol or ethanol as a motor fuel. NHTSA wishes to have any necessary safety standards in place to support the safe introduction and operation of alternative fuel vehicles, and not impede the development and advancement of such vehicles and associated technology. Abstract: Standard No. 301, Fuel System Integrity, has as its purpose the reduction of deaths and injuries occurring from fires that result from fuel spillage during and after motor vehicle crashes. However, CNG and propane, when used as motor fuels, are not covered under the current requirements of this standard. NHTSA desires that any safety performance standard which may be established for the fuel system integrity of vehicles using CNG or propane as a motor fuel be in harmony with the activities and regulatory authority of others to the extent possible. This notice announces a public meeting to obtain comments on the potential establishment of safety performance standards for vehicles powered by CNG or propane, as well as serving as an Advance Notice of Proposed Rulemaking (ANPRM) for that purpose. The purpose of this ANPRM is

to explore approaches that might be used if the agency were to establish a safety performance standard for the fuel system integrity of vehicles using CNG or propane as a motor fuel. The cost and benefits are unknown at this time. This action is significant because of substantial public interest.

Significance: Nonsignificant

Legal Authority: 15 USC 1407; 15 USC 1410

CFR Citation: 49 CFR 552; 49 CFR 571

Abstract: Federal Motor Vehicle Safety Standard (FMVSS) No. 301 specifies requirements for the integrity of motor vehicle fuel systems so that fires that result from fuel spillage during and after motor vehicle crashes may be reduced. This standard applies to passenger cars and school buses, and to multipurpose passenger vehicles, trucks, and buses that have a gross vehicle weight rating of 10,000 pounds or less. The California Highway Patrol (CHP) petitioned the agency to specify requirements in FMVSS No. 301 to reduce fuel spills from the fuel tank or fuel lines on heavy trucks and truck tractors over 10,000 pounds. The fuel spills, according to the CHP, are due to damage caused by road debris. On May 2, 1988, the agency published a grant of petition for rulemaking in the Federal Register for the CHP petition. However, the agency is granting the petition pending the results of its forthcoming investigation of fuel-tank fires in over-the-road trucks, on which research is presently underway.

Abstract: Accidents involving heavy trucks have a disproportionate (higher) fatality rate than all other motor vehicles. This rulemaking proposes to reinstate stopping distance performance requirements in Standard 121 so as to help improve heavy vehicle braking performance and hence reduce the number of accidents involving these vehicles. Although a court decision found that Standard 121, as it then existed, was unenforceable, additional accident data and technical review have persuaded NHTSA that the court's requirements can now be met.

Significance: Nonsignificant

Abstract: The purpose of this standard is to reduce traffic accidents, and deaths and injuries resulting from traffic accidents, by providing adequate illumination of the roadway, and by enhancing the conspicuity of motor vehicles on the public roads so that their presence is perceived and their signals understood, both in daylight and in darkness or other conditions of reduced visibility. This rulemaking will (1) amend the lower beam headlighting requirements to ensure that the ability of headlighting systems to illuminate overhead traffic signs be maintained, and (2) require manufacturers of replaceable light sources to file dimensional information with NHTSA in a public docket pursuant to a new regulation, proposed Part 564, "Replaceable Light Source Dimensional Information," in lieu of petitioning the agency for amendments to FMVSS No. 108 whenever manufacturers wish to introduce new lighting systems.

Abstract: This rulemaking to establish a new standard for passenger-car brake systems grew out of NHTSA's efforts to harmonize its standards with international ones. After review of comments to the NPRM and SNPRM, a second SNPRM proposed refined and revised test procedures and performance requirements which should achieve harmonization while being fully consistent with the National Traffic and Motor Vehicle Safety Act. The new standard 135 would replace standard 105 as it applies to passenger cars. CFR Citation: 49 CFR 571.121

Abstract: This action proposes two alternative amendments concerning electrical power sources for trailer antilock brake systems. Trailer antilock systems would be required to be powered by a separate electrical circuit, with the stop lamp circuit being used as a source of backup power, or the agency would rescind the existing requirement that trailer antilock systems be powered from the stop lamp circuit.

2534. IMPORTATION OF MOTOR VEHICLES AND EQUIPMENT SUBJECT TO FEDERAL SAFETY, BUMPER, AND THEFT PREVENTION STANDARDS

Significance: Nonsignificant

Legal Authority: PL 100-562

CFR Citation: 49 CFR 591

Legal Deadline: None

Abstract: This action proposed that persons who wish to import vehicles not meeting Federal standards pursuant to 49 CFR 591.5(j) submit information in support of a request for admission and obtain in advance of such importation a letter of permission from NHTSA. The

alternative would be to retain the existing requirement, which does not require advance approval. There are no additional "costs" since importers must already submit the information at the time of entry. The benefits are that noncomplying vehicles will not be entered under subterfuge, having been screened by NHTSA prior to their arrival in the United States. Thus, safety is enhanced by keeping them off the roads.

Significance: Nonsignificant

Legal Authority: 15 USC 1392; 15 USC 1401; 15 USC 1403; 15 USC 1407

CFR Citation: 49 CFR 571.106

Legal Deadline: None

Abstract: Federal Motor Vehicle Safety Standard No. 106 requires hoses, end fittings, and hose assemblies, except under limited circumstances, to be marked in a manner providing source identification for the hose, fitting, or assembly. Paragraphs S12 and S13 provide two exceptions. Paragraph S12 exempts "assemblies" from individual labeling of the "components." The "assembly" must still be labeled as specified in the appropriate paragraphs S5.2, S7.2, and S9.2. Paragraph S13 exempts hoses, fittings, and assemblies, if each or all are installed in a vehicle to which the standard applies (i.e., new vehicles, factory assemblies) from the individual requirements for labeling these components or assemblies. The NPRM proposed to clarify these requirements as they apply to the labeling of components or assemblies which use "reusable" fittings. A conflict may exist as to whether these materials with "reusable" components are considered to be "assemblies."

Significance: Nonsignificant

Legal Authority: 15 USC 1392; 15 USC 1407

CFR Citation: 49 CFR 571

Abstract: The NPRM proposed to require for towing vehicles that actuation at the interface between towing vehicles and trailers be at least as fast as actuation at the towing vehicle brake chambers; however, review of comments determined the requirement would lead to loss of manufacturing flexibility by requiring more custom design at unjustified additional cost. Therefore, that portion

of this project was terminated in the SNPRM. In that same document, different requirements were proposed concerning control line pressure differential.

Significance: Agency Priority

Legal Authority: 23 USC 401

CFR Citation: 23 CFR 1325

Legal Deadline: None

Abstract: This regulation implements an improved National Driver Register (NDR), the purpose of which is to assist chief driver licensing officials of participating States in exchanging information regarding the motor vehicle driving records of individuals. The objective is to prevent the issuance of driver's licenses to individuals whose licenses to operate a motor vehicle have been withdrawn or denied, especially those convicted of drunk driving. By participating in the NDR, State Driver licensing officials may better identify problem drivers and deny them access to the nation's highways, thus making them safer. Annual cost to the Government will be between $5 and $7 million. This action was considered significant because of the impact on transportation safety.

Abstract: Federal Motor Vehicle Safety Standard No. 105 requires vehicles to have a brake failure indicator lamp which illuminates upon a failure within the brake system. This failure may be the result of a gross loss of pressure (Par. S5.3.1(a)) or a drop in the level of brake fluid in any master cylinder reservoir compartment to less than a specified safe level (S5.3.1(b)). The standard does not specify which mode of failure must be specified. This mode selection is left to the choice of the manufacturers. A petition from Mr. Sinclair Buckstaff, Transamerica Consultant Engineers (Buckstaff) requested that a loss of pressure indicator be made mandatory with a fluid level loss indicator to be optional (preferably mandatory) also, along with the pressure failure indicator. Buckstaff maintained a master cylinder internal failure can occur wherein no failure indication would ever occur if only a fluid level loss indicator were installed on the vehicle. NHTSA concluded there is not a sufficient safety need to require both types of brake-failure indicators. There was nothing to indicate the various combinations of warning lights and subjective indicators currently (cont)

2580. EXEMPTION FROM AVERAGE FUEL ECONOMY STANDARDS

Significance: Nonsignificant

Legal Authority: 15 USC 2002

CFR Citation: 49 CFR 525

Legal Deadline: None

Abstract: Prototype Automotive Services petitioned for exemption from the generally applicable average fuel economy standards for Model Year 1989. These vehicles have a major manufacturer as well as a low volume manufacturer, and are essentially high performance versions of GM cars sold through GM dealers. The petition was denied, as it would establish a precedent whereby major manufacturers could transfer significant numbers of low fuel economy vehicles into fleets exempt from the industrywide standard and, thus, disturb the statutory scheme adopted by Congress. Nor should exemptions be

available to manufacturers whose primary operations do not involve changing the basic nature of major manufacturers' cars.

Significance: Nonsignificant

Legal Authority: 15 USC 2002

CFR Citation: 49 CFR 525

Legal Deadline: None

Abstract: This action rejected the petitions from Ferrari for exemption from the generally applicable average fuel economy standards for Model Year 1988. The agency had concluded that Ferrari is not eligible for a low volume exemption for MY 1988. This action does exempt Ferrari from the generally applicable standard for Model Year 1986 and established an alternative standard of 16.1 mpg. The effective date for this exemption and alternative standard was August 9, 1991. This decision reflects a change in the approach to determining eligibility for low volume exemptions when there are multiple manufacturers within a control relationship.

DOT—UMTA **Final Rule Stage**

Abstract: This regulation would implement section 303 of the Surface Transportation and Uniform Relocation Assistance Act of 1987. It would define the procedures applicants must follow in developing fixed guideway projects. It also would set forth the means by which the agency will evaluate cost-effectiveness, the results of alternatives analysis, and the degree of local financial commitment as required by law. This regulation is significant because it involves important departmental policy. However, a provision of the Department of Transportation and Related Agencies Appropriations Act, 1990 (Pub. L. 101-164) prohibits the use of any funds made available by this Act to "implement or enforce" the proposed rule. Therefore, UMTA is awaiting clarification of how to proceed in view of the imposed restrictions.

Significance: Nonsignificant

Legal Authority: 49 USC 1377; 49 USC 1441

CFR Citation: 14 CFR 241

Abstract: Historically, the source document for the Passenger Origin-Destination Survey was the auditor's coupon of the ticket. Until recently, these coupons provided all the information that was needed for the Survey. In the last few years, the carriers have begun using trip passes in conjunction with the tickets, thereby eliminating some of the data that is required to be reported in the Survey. Other innovations used by the industry, such as funnel flights and code-sharing, have impacted the Survey and obscured some of the data that is required to be reported, such as change of planes and junction points. This rulemaking will explore whether there are alternative sources for the data and modernize the collection system to keep pace with the industry.

Abstract: International passenger origin-destination survey data and service segment data (originally Schedule T-9, now Schedule T-100) submitted by U.S. air carriers have a permanent confidential period. In the public interest, such data may be

released to other Federal agencies or State governments for internal use only. The Department will explore whether a shorter confidential period can be instituted that would be consistent with the confidential period for other schedules filed with the Department.

Significance: Agency Priority

Legal Authority: 49 USC 1802 to 1808

CFR Citation: 49 CFR 171 to 179

Abstract: ANPRM invited comments on the need for, and possible consequences of, DOT extending the application of its Hazardous Materials Regulations to all intrastate transportation of hazardous materials in commerce. This rulemaking is significant because of substantial public interest and possible federalism implications. The Hazardous Materials Transportation Uniform Safety Act of 1990 mandates that the Secretary issue regulations for the intrastate transportation of hazardous materials in commerce.

Significance: Agency Priority

Legal Authority: 49 USC 1804; 49 USC 1805

CFR Citation: 49 CFR 171; 49 CFR 173; 49 CFR 177

Legal Deadline: Final, Statutory, September 30, 1992.

Abstract: DOT lacks comprehensive data on the number, volume, and other

statistics characterizing the transportation of hazardous materials in commerce. Comments will be requested on the burdens and benefits associated with various alternatives that could be used to obtain such information. The registration of carriers and shippers is one such alternative. This rulemaking is significant because of the public interest and safety implications. Section 8 of the Hazardous Materials Transportation Uniform Safety Act of 1990 amended the Hazardous Materials Transportation Act to require that carriers and offerors of certain categories of hazardous materials file registration statements with the Department of Transportation, and pay fees to cover the costs of processing those statements.

Legal Authority: 49 USC 1672; 49 USC 2002

CFR Citation: 49 CFR 192; 49 CFR 195

Legal Deadline: Final, Statutory, November 1, 1989.

Abstract: Maintenance of appropriate information about pipelines is essential for emergency response, compliance with safety standards, and other purposes. As part of a continuing policy to adopt similar requirements for gas and hazardous liquid pipelines where appropriate for safety, this action proposes to equalize as far as possible the requirements that gas and liquid operators keep maps and records to show the location and other characteristics of pipelines. Operators would also be required to keep an inventory of pipe and annually report mileage and other facts. In addition, operators would be required to provide certain information to State agencies upon request. This is a significant action because of congressional and State concerns about the need for appropriate public officials to have pipeline information.

Abstract: The Sanitary Food Transportation Act of 1990 (SFTA; Pub. Abstract: Currently commuter air carriers providing scheduled passenger service file two quarterly traffic schedules. One schedule summarizes nine traffic elements while the other schedule provides the origination and destination for each carrier's on-line passengers. The Department has installed a new traffic and market data system for certificated and foreign air carriers called the T-100 system. This system could be used for commuter air carriers, providing the Department with one automated traffic and market data system for all carriers. This system would be less burdensome for the commuter air carriers and be more efficient for the user.

Significance: Nonsignificant

Legal Authority: 49 USC 2002

CFR Citation: 49 CFR 195

Legal Deadline: None

Abstract: The Federal pipeline safety standards governing hazardous liquid pipelines do not apply to pipelines operated at 20 percent or less of the specified minimum yield strength of the pipe. When the standards were issued in 1969, these pipelines were thought not to pose an unreasonable risk to public safety because of their low operating stress levels. Since then, however, a number of accidents have been reported on low stress level pipelines, particularly involving harm to the environment. This rulemaking action would assess the need to extend the Federal safety standards to cover these low stress level pipelines (except gathering lines), and, if warranted, apply the standards to those pipelines.

Abstract: The gas pipeline safety standards in 49 CFR Part 192 currently incorporate by reference the National Fire Protection Association Standards Nos. 58 and 59 for the design, installation, and operation of petroleum gas systems. However, these NFPA standards are not referenced for the design, installation, and operation of peak shaving plants used to supply petroleum gas to an otherwise natural gas distribution system, although NFPA Standard No. 59 is meant for that purpose. Abstract: This action will propose to establish detailed training requirements for persons involved with the transportation of hazardous materials. Establishing more detailed training requirements should diminish the number of hazardous materials transportation incidents which can be attributed to human error. At this time, the potential cost of establishing this program is unknown. This rulemaking is significant because of public interest and safety implications.

2653. + HYDROSTATIC TESTING OF CERTAIN HAZARDOUS LIQUID PIPELINES

Significance: Regulatory Program

Legal Authority: 49 USC 2002

CFR Citation: 49 CFR 195

Legal Deadline: None

Abstract: Recent accidents involving petroleum pipelines demonstrate the potential for catastrophic losses if a large spill occurs in a populated area. Studies have shown that accidents attributable to latent material or construction defects can be prevented by restricting operation to not more than 80 percent of a prior test or operating pressure. In this regard, significant results have been achieved by imposing such an operating restriction on pipelines that carry highly volatile liquids. This rule would extend this existing safety standard to all hazardous liquid pipelines that are subject to Part 195. This rulemaking is significant because of substantial public interest in the safety implications.

Significance: Agency Priority

Legal Authority: 49 USC 1672; 49 USC 1804; 49 USC 2002

CFR Citation: 49 CFR 192; 49 CFR 195

Legal Deadline: None

Abstract: Adequate procedures for pipeline operation and maintenance, backed up by personnel training, have proven effective in minimizing the potential for accidents. Gas operators are required to have such procedures, but the existing requirements lack the clarity and specificity needed to assure a uniform, broad-based level of safety for all pipelines. Therefore, this proposal would clarify the existing requirements, make them more comprehensive, and, where appropriate, similar to the more detailed requirements applicable to the operation and maintenance of hazardous liquid pipelines. Also, a few additions and clarifying changes would be made to the hazardous liquid pipeline requirements. This is a significant action because of the need for adequate procedures to provide a basis for training and qualifying operator personnel. A related rulemaking to provide procedures requiring operators to amend operation and maintenance plans, and make operators subject to enforcement sanctions for failure to maintain plans, is entitled Amendment of an Operator's Plans or Procedures (RIN 2137-AB77).

Significance: Agency Priority

Legal Authority: 49 USC 1672(a); 49 USC 2002(e)

CFR Citation: 49 CFR 192; 49 CFR 195

Legal Deadline: None

Abstract: Each year a large percentage of gas and hazardous liquid pipeline accidents are caused by excavation damage. Based on existing rules intended to reduce damage to gas pipelines in populated areas, this action would require hazardous liquid pipeline operators to provide damage prevention programs and gas operators would have to expand their programs to cover rural areas. This is a significant action because of the widespread interest in the use of "one-call" programs to prevent damage to buried pipelines.

Significance: Nonsignificant

Legal Authority: 49 USC 1672

CFR Citation: 49 CFR 192

Legal Deadline: None

Abstract: Corrosion is a major cause of gas and hazardous liquid pipeline accidents. A safety standard applicable to liquid pipelines requires operators to examine exposed pipe for evidence of external corrosion and, if harmful corrosion is found, to investigate further to determine the extent of the corrosion. As part of a continuing policy to adopt similar requirements for gas and liquid pipelines where appropriate for safety, this action proposes that exposed gas pipelines with evidence of harmful corrosion be investigated to determine the extent of the corrosion.

Abstract: These interim final regulations amend MARAD's regulations regarding transfers of interests in U.S. documented vessels and approval of vessel mortgagees and trustees pursuant to P.L.100- 710. Publication of an interim final rule permitted implementation of the new law without a hiatus and minimized transitional uncertainty among the corporate and financial communities that are affected. This rulemaking is considered significant because of substantial public interest. In view of comments received to the first interim final rule, a new NPRM was published, and a second interim final rule issued.

2680. + DETERMINATION OF FAIR AND REASONABLE GUIDELINE RATES FOR LESS THAN SHIPLOAD LOTS OF BULK PREFERENCE CARGOES CARRIED ON U.S.-FLAG LINER VESSELS

Significance: Agency Priority

Legal Authority: 46 USC app 1114(b)

CFR Citation: 46 CFR 383

Legal Deadline: None

Abstract: Proposed revision of 46 CFR Part 383 would conform many of its provisions to those in the regulations governing the calculation of guideline rates by the Maritime Administration (MARAD) for bulk preference cargoes carried on bulk vessels (46 CFR Part 382). MARAD's experience in administering the bulk vessel regulations has demonstrated the need for comparable provisions in the liner regulations. The principal amendment would be that MARAD would use the actual operating costs of each vessel type in the carriage of preference cargoes, rather than use a system of combined average and actual costs that has not accomplished its objectives. This rulemaking is considered significant because of substantial public interest.

Significance: Nonsignificant

Legal Authority: 46 USC app 1114

CFR Citation: 46 CFR 340

Abstract: This revision would broaden the scope of the regulations to include chassis (a specialized trailer used in transporting a container) and chassis suppliers in the scheme of priority use and allocations of shipping services containers and port facilities and services for national security and defense related operations to ensure that chassis are available for use by a defense agency in time of deployment of U.S. Armed Forces. Significance: Nonsignificant

Legal Authority: 46 USC app 1114(b); 46 USC app 1241a; 50 USC app 1291

CFR Citation: 46 CFR 327

Abstract: MARAD is amending its regulations at 46 CFR 327, which establish the procedure for its administrative review of seamen's claims for death, illness or injury, or other specified causes arising out of employment onboard a vessel owned or controlled by MARAD. These amendments are intended to facilitate

and expedite the review of these claims, which have increased significantly as the result of MARAD's shipping activities related to Operation Desert Shield/Desert Storm.

Significance: Nonsignificant

Legal Authority: 46 USC app 1114

Abstract: MARAD is removing 46 CFR 222 that now contains two reporting requirements. Since the statutory authority for the filing requirement at 46 CFR 222.1 was repealed by PL 101-225, there is no longer any legal basis for that filing requirement. Significance: Regulatory Program

Legal Authority: 31 USC 6501; 31 USC 6503; 5 USC 301; 42 USC 4213

CFR Citation: 31 CFR 205

Legal Deadline: Final, Statutory, October 24, 1992.

Abstract: This regulation governs the transfer of funds for Federal programs and rectifies problems arising when States administer Federal programs. These problems are: 1) the lack of codified funds transfer procedures; 2) States earning undue interest when they draw down Federal funds before the immediate need to make payments; and 3) States losing interest when they pay out their own funds because the Federal Government does not transfer funds timely. This regulation implements the Cash Management Improvement Act of 1990, which requires that: 1) Federal and State governments minimize the time between the transfer of funds from the U.S. Treasury and the redemption of checks by States; 2) the Secretary of the Treasury enter into an agreement with each State to codify funding techniques; 3) States pay the Federal Government interest on funds transferred before the immediate need to redeem checks; and 4) the Federal Government pay States interest when States expend their own funds for Federal programs. This regulation ensures that neither the Federal Government nor the States benefit or suffer financially when transferring funds.

Significance: Agency Priority

Legal Authority: 27 USC 205(e)

CFR Citation: 27 CFR 4.35

Abstract: ATF is soliciting comments on whether the meaning of "produced and bottled by" appearing on wine labels should be modified. The Wine Institute has petitioned ATF to permit this term to be used on wine labels even when producing and bottling activities take place or different locations, in cases when the bottling winery exercises control or ownership over the production winery, and when both wineries are located in the same viticultural areas. Under existing regulation the place where each activity occurs must be shown. On the basis of comments received, ATF will decide whether or not to propose this change.

Semiannual Agenda of Regulatory Actions

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Semiannual agenda of regulations.

SUMMARY: As required by the Regulatory Flexibility Act and Executive Order 12291, the Office of the Comptroller of the Currency (OCC) has prepared this semiannual agenda of its rules and regulations currently under review and scheduled for review. Regulatory actions taken since the publication of the OCC's previous semiannual agenda on April 22, 1991 (56 FR 17757), are also included. It is expected that this semiannual agenda will enable the public to be more aware of and allow it to more effectively participate in the OCC's regulatory activity.

ADDRESSES: The mailing address for all contacts: Office of the Comptroller of the Currency, 250 E Street SW., Washington, DC 20219.

FOR FURTHER INFORMATION CONTACT: For general information about this semiannual agenda, contact Nancy Lowther, Financial/Regulatory Analyst, Legislative and Regulatory Analysis Division, (202) 874-5090.

For additional information about a particular item on this semiannual agenda, contact the individual identified as the contact person.

SUPPLEMENTARY INFORMATION: The OCC has determined that none of the rulemakings discussed in this semiannual agenda require a regulatory flexibility analysis; all entries have been determined not to have a "significant impact on a substantial number of small entities" and, therefore, are not subject to the provisions of the Act. Additionally, none of the rules are major rules as defined by Executive Order 12291. Executive Order 12291 defines a "major rule" as one likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

(3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-

based enterprises in domestic or export markets.

2717. FIDUCIARY POWERS OF NATIONAL BANKS AND COLLECTIVE INVESTMENT FUNDS

Legal Authority: 12 USC 93a

CFR Citation: 12 CFR 9

Legal Deadline: None

Abstract: The OCC is proposing to amend 12 CFR 9 to address the conflicts of interest created when a national bank is the trustee to an issue of debt securities and enters into additional banking relationships with the issue or issuer, including, but not limited to, the following: securities underwriter, letter of credit enhancer, originator of loans to collateralize the debt securities, or a commercial credit provider. Such multiple roles may serve to reduce the quality of disinterested services provided to both issuers and investors and further expose the bank and the depositors to significant liabilities if investors or issuers suffer losses as a result of a bank trustee's failure to act in their best interests. To the extent possible, the OCC would like to ensure that national banks do not assume conflicting roles which may become unmanageable if the security goes into default. Although the opportunity for national banks to serve in more than one capacity with respect to a debt security issue is not new, there appears to be an increased interest by national banks to undertake multiple roles. The effect on small entities will be considered in the (cont)

Abstract: The proposed rule would: (1) Eliminate the requirement for regulated institutions to obtain appraisals by certified or licensed appraisers for real estate related financial transactions having a value, as defined in the rule, of $100,000 or less; (2) permit regulated institutions to use appraisals prepared for loans insured or guaranteed by an agency of the Federal Government if the appraisal conforms to regulations or other written requirements of the

Federal insurer or guarantor; and (3) add a definition of "real estate" and "real property" to clarify that the appraisal regulation does not apply to mineral rights, timber rights, or growing crops. This regulation will not have a significant economic impact on a substantial number of small entities.

Legal Authority: 12 USC 93a; 12 USC 92a; 12 USC 481

CFR Citation: 12 CFR 9

Legal Deadline: None

Abstract: The OCC is proposing to amend its regulations governing the exercise of fiduciary powers by national banks. The intent of these amendments is twofold: First, the proposed rule is intended to codify recent court decisions regarding collective Individual Retirement Account (IRA) funds; and second, the proposed rule is intended to liberalize and make less burdensome the requirements of 12 CFR 9.18, regarding the management of collective investment funds by institutions exercising fiduciary powers, in a manner which would preserve appropriate protection for trusts and persons with interests therein. In addition to the codification of recent court decisions that authorize national banks to establish collective IRA funds which are registered with the Securities and Exchange Commission under the Investment Company Act of 1940, the proposal also would authorize the establishment of such registered collective funds whose assets consist of Keogh accounts or any other retirement accounts authorized under sections 401 and 408 of the Internal Revenue Code (26 USC 401 and 408). The proposed rule would also eliminate certain Federal regulatory provisions which (cont)

CFR Citation: 12 CFR 32.2(d)

Legal Deadline: None

Abstract: This rulemaking will revise the definition of a "contractual commitment to advance funds" in response to comments received on the Temporary Rule on National Bank Lending Limits, at 53 FR 23752 (June 24, 1988). Comments were generally in favor of the temporary rule, but expressed concern about its impact on banks which had not experienced a decline in capital. This revision addresses those concerns through amendment of the definition of a "contractual commitment to advance funds." This action will return to banks some flexibility in monitoring their lending limits and outstanding loan commitments. This regulation will not have a significant economic impact on a substantial number of small entities.

In addition to addressing national bank lease financing transactions entered under CEBA, the regulation incorporates Interpretive Ruling 7.3400, which addresses national bank lease financing authority previously interpreted as existing under 12 USC 24(7), as the functional equivalent of a loan. Legal Authority: 12 USC 24; 12 USC 92a

CFR Citation: 12 CFR 12.7

Legal Deadline: None

Abstract: This rulemaking would broaden an exemption from requirements that banks maintain certain records and establish certain written policies and procedures. Under the proposal, the current exemption for banks with an average of less than 200 securities transactions per year is expanded to 1,000 transactions per year. The purpose of broadening the exemption from 200 transactions per year to 1,000 transactions per year is to reduce the regulatory burden on banks of all sizes that engage in a low number of securities transactions per year. Small entities are the primary beneficiaries of this burden-reducing amendment.

In order to aid the Department of Agriculture in monitoring the sugar drawback programs, the Customs Regulations are amended on an interim basis to require all sugar drawback entries be filed in the New York region. Legal Authority: 26 USC 7518 Internal Revenue Code of 1986

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The regulation is intended to permit shipping operators who have established capital construction funds under the Merchant Marine Act of 1936 as amended, to make "qualified withdrawals" from the funds to lease vessels, in addition to the present practice of purchasing vessels. There are no practical alternatives other than purchasing or leasing vessels. The potential costs of leasing are the same as purchasing; no more money than is deposited into a capital construction fund can be used. The owner of a fund can decide whether leasing or purchasing is cheaper. The benefit (purpose) is to permit shipping industry acquisition practices to be consistent with a long-term trend toward vessel acquisition through lease rather than purchase.

The issuance of parent corporation stock in cancellation of subsidiary corporation indebtedness will come within the common law stock-for-debt exception to cancellation of indebtedness income (as limited by Section 108 (e) (8) and Section 108 (e) (10) without resort to a recapitalization analysis (whether deemed or actual). When creditors of more than one bankrupt member of the group receive parent corporation stock, the stock received by all the creditors may be aggregated for purposes of determining whether each ownership change meets the requirements of Section 382 (l) (5). Collateral consolidated return and reorganization issues will be considered.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 382 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1

Abstract: These proposed regulations suspend the recognition of income and expenses if certain partners, such as loss corporations accrue unpaid guaranteed payments. The partner's income as well as the partnership's expense will be recognized in the taxable year in which the partnership pays, with an unrestricted transfer of money, the accrued guaranteed payment. The proposed regulations prevent loss corporations, and other covered taxpayers not subject to U.S. tax, from structuring partnership guaranteed payment that diverts taxable income to the loss corporation or other non U.S. taxpayer which is greater than the ultimate economic benefit realized from the guaranteed payment.

Abstract: The Tax Reform Act of 1986 provides for a new method of computing the tax on distributions of income accumulated by a trust in prior years. The new method, in effect, determines the tax attributable to an accumulation distribution by averaging the distribution over the number of years during which the income was earned by the trust. This is accomplished by including, for purposes of tentative computations, a fraction of the income received from the trust in the beneficiaries' income for 3 of the 5 preceding years. Those 3 years are determined by taking from the 5 preceding years the year with the highest taxable income and the year with the lowest. The fraction of the income included in each of the 3 years is based upon the number of years during which the income is accumulated by the trust. The average yearly additional tax determined by recomputing the tax for the 3 years is then multiplied by the number of years during which the distribution was accumulated. The resulting tax so computed may be offset by a credit for any taxes previously paid by the trust with respect to the accumulated income. (cont)

Legal Deadline: None

Abstract: Grantor trusts would file 1099's or nothing at all with the Service, and provide a statement of earnings deductions and credits to each grantor. This will enable the Service to match the reported income from grantor trusts with the grantor's tax return. Different procedures will be required for trusts with single grantors as opposed to multiple grantors. Corporation grantors will be included. Other considerations will be whether backup withholdings rules apply and whether there is a legal basis for requiring a payor to report income directly to the grantor rather than the trust.

2954. TIERED PARTNERSHIP RULES

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1

Legal Deadline: None

Abstract: The regulation will address whether a foreign partner in a tiered partnership arrangement is engaged in a trade or business in the U.S. by virtue of membership in that tiered partnership where the second tier partnership meets the requirements of being in U.S. trade or business. The alternatives are 1) to conclude the foreign partner is engaged in U.S. trade or business because any member of the tiered partnership arrangements is; and 2) to conclude the foreign partner is not engaged in a U.S. trade of business where the first tier partnership is not so engaged. Other considerations include the meaning of "principal place of business" and whether an entity may have more than one, and attribution rules applicable to the entities. A problem with the second alternative is that it arguably gives priority to form over substance, however, there are several methods by which the first alternative could be avoided and their appears to be no policy reason to prefer one form of doing business over another. Furthermore, no additional tax would be collected by following alternative 1.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 876 Internal Revenue Code of 1986; 26 USC 931 Internal Revenue Code of 1986

Abstract: The Tax Reform Act of 1986 eliminates the requirement that there be a mirrored system of taxation in Guam and the CNMI, and coordinates the tax system of these possessions and of American Samoa with the U.S. tax system. Guam the CNMI and American Samoa are granted full authority over their own local income tax systems, with respect to income of bona fide residents sourced within or effectively connected with the conduct of a trade or business within any of these possessions. This grant of authority is effective, however, only if and so long as an implementing agreement is in effect between the possession at issue and the United States which provides for elimination of double taxation, prevention of evasion or avoidance of U.S. tax exchange of information and other administrative matters. Regulations are needed to clarify who qualifies as a bona fide resident and to determine sourcing rules.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 932 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1

Legal Deadline: None

Abstract: Prior to the Tax Reform Act of 1986, inhabitants of the Virgin Islands satisfied their U.S. tax liability

by filing a return with the Virgin Islands. The Tax Reform Act of 1986 repealed the inhabitant rule to correct an erroneous interpretation of its operation in connection with the Virgin Islands mirror code. Section 1274 of the Tax Reform Act of 1986 clarifies the filing obligations of individuals in the Virgin Islands. Bona fide residents of the Virgin Islands are required to file only one return with the Virgin Islands in which they report worldwide income and identify the sources of income from the Virgin Islands will be required to file two identical tax returns one with the US and one with the Virgin Islands and pay a pro rata amount of tax to each. Regulations are needed to clarify who qualifies as a bona fide resident. It is anticipated that the regulations will provide a facts and circumstances test for determining bona fide resident status. It is unknown what the operational costs will be.

2996. CLARIFYING DELETION OF REQUIREMENT OF SECTION 1.1502-47(D)(12) (C) THAT IN APPLYING THE TACKING RULE, PROFIT LIFE ACTIVITIES NOT BE SEPARATED FROM LOSS LIFE ACTIVITIES

Legal Authority: 26 USC 1502 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1.1502

Legal Deadline: None

Abstract: Section 1.1502-47(d)(12)(C) restricted the separation of profitable life activities from loss life activities to prevent the gaming that otherwise could occur under the "bottom-line" consolidation rule mandated by section 818(f) as in existence prior to the Enactment of the Tax Reform Act of 1984 (TRA 1984), Public Law 98-369. As a result of the new method of taxing life insurance companies enacted in the TRA 1984, the bottom-line consolidation abuse potential is eliminated, thus eliminating the need for section 1.1502-47(d)(12)(C). Removing this provision will remove an unnecessary restraint on transactions, and a potential device to voluntarily deconsolidate.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 1502 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1.1502-13

Legal Deadline: None

Abstract: Section 1.1502-13 of the Income Tax Regulations provides the general rule that the term intercompany transaction means a transaction during a consolidated return year between corporations which are members of the same group. Section 1.1502-13 (f) provides as a general rule that deferred gain attributable to a selling member will be triggered when the asset leaves the group. The regulation, in effect, does not deal with a situation where a selling member exchanges property subject to Section 1.1502-13 rules in a nontaxable exchange to an outside party. Moreover, the current regulations do not adequately cover tax free transactions between members. This proposed regulation will provide rules for certain common nontaxable exchanges within the affiliated group.

Abstract: Currently, the information reporting requirements in the Internal Revenue Code and the Income Tax Regulations allow substitute 1099 Forms to be furnished to recipients in most instances. The requirements for the substitute forms vary, some allowing "substantially similar" forms or "reasonable facsimiles" while some sections actually require copies of official Forms 1099. This project will amend the regulations to specify the requirements for substitute information reporting statements, which will be standardized.

Abstract: Section 1.6332-1(c) currently provides that any person in possession of or obligated with respect to property or rights to property subject to levy and upon which levy has been made who surrenders the property or rights to property, or discharges the obligation to the district director is discharged from any obligation or liability to the delinquent taxpayer. Section 1015(t) of Technical and Miscellaneous Revenue Act of 1988 amends Section 6332 of the Internal Revenue Code to provide that a person who honors a levy is protected from any obligation or liability to any other person as well as the delinquent taxpayer. This should cause a reduction in the number of interpleader actions filed because of concerns over liability to third parties.

3050. CHANGE OF DUE DATES FOR CERTAIN AMOUNTS AGAINST WHICH AN OVERPAYMENT IS CREDITED

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986

CFR Citation: 26 CFR 301

Legal Deadline: None

Abstract: Under section 6611(b)(1), if an overpayment is credited against an underpayment, interest on the overpayment runs from the date of the overpayment until the due date of the amount against which the credit is taken. Section 301.6611-1(h)(2)(v) of the regulations provides that in the case of a credit against assessed interest, the due date is the assessment of such interest. Section 301.6611-1(h)(2)(vi) of the regulations provides that in the case of a credit against an amount assessed as an additional amount, addition to the tax or assessable penalty, the due date is the date of assessment. A literal application of these regulations' provisions may give a taxpayer interest where none should be paid. The proposed regulations correct this problem by changing the due dates of interest and certain additions to the tax.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 6695 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1.6695-1 (b)

Legal Deadline: None

Abstract: Section 1.6695-1 (b) currently requires that, with one exception, income tax return preparers must manually sign returns or claims for refund signed by them. The exception

does allow preparers of returns and refund claims for nonresident aliens to use facsimile signatures under certain circumstances. Section 645 (a) of the Internal Revenue Code, added by section 1403 (a) of the Tax Reform Act of 1986, requires trusts, with certain limited exceptions, to use a calendar taxable year. The calendar year requirement means that, instead of being able to spread their duty to sign trust returns over the entire course of a year, preparers must now sign all trust returns before April 15 in order to present them to clients for timely filing. To alleviate this hardship, we are examining the advisability of permitting income tax return preparers of Forms 1041, U.S. Fiduciary Income Tax Returns, to use facsimile signatures and under what conditions such use would be permitted and appropriate.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 7425 Internal Revenue Code of 1986

CFR Citation: 26 CFR 301

Legal Deadline: None

Abstract: Section 301.7425-4(b)(3)(ii), which deals with excess expenses incurred by a purchaser of property after a foreclosure sale and before redemption, provides that the Service may request a written itemized statement from the purchaser regarding excess expenses. If the purchaser does not respond within 15 days, it shall be presumed that no excess expenses are payable. However, even after the 15-day period expires, a payment for excess expenses shall be made after the redemption within a reasonable time following the verification by the district director of a written itemized statement submitted by the purchaser. There is no specific time frame set for the purchaser to submit his claim after the redemption and after the expiration of the 15-day period. We are examining the feasibility of establishing a 30-day time limit within which a final claim for excess expenses must be submitted by the purchaser after the sale of the property. This will eliminate claims for reimbursement of expenses that may be submitted after redemption and sale of the property, where the liens were fully satisfied and released, and all surplus funds returned to the taxpayer.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 7426 Internal Revenue Code of 1986

CFR Citation: 26 CFR 301

Legal Deadline: None

Abstract: The existing language of the regulations under IRC section 7426 is ambiguous and confusing. It has been used in at least one court case as support for the proposition that whenever the Service attempts to seize property of a delinquent taxpayer that is in the custody of a Government agency, regardless of the form of the seizure (i.e. service of a Notice of Levy or of a Request for Setoff), such a seizure is always a setoff, and any third party injured by such a seizure has no cause of action under IRC section 7426. This is not the Service's position. The regulations should be clarified to rectify this misinterpretation.

Abstract: The Tax Reform Act of 1986 (the "Act") repealed the last vestiges of the General Utilities doctrine ("GU repeal"), thereby requiring corporations to recognize gain in most cases upon the distribution of appreciated property to their shareholders. The Act granted the Secretary authority to promulgate regulations necessary to carry out the purposes of the Act. It has been determined that GU repeal can be circumvented in certain circumstances, including, downstream mergers, conversion into tax exempt entities, and cross ownership. This project will seek to identify these areas and promulgate regulations to assure corporate level gain recognition as required by the Act.

3147. ALLOCATION OF A LOSS CORPORATION'S INCOME OR LOSS FOR THE TAXABLE YEAR THAT INCLUDES THE CHANGE DATE BETWEEN THE PERIODS ENDING WITH AND AFTER THE CHANGE DATE

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 382 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1

Legal Deadline: None

Abstract: Except as provided in regulations, sections 382(b)(3)(A) and (d)(1) of the Internal Revenue Code of 1986 provide for a ratable allocation of income or net operating loss, respectively, for the taxable year that includes the change date. Notice 87-79, 1987-2 C.B. 387, states that regulations will, in certain cases, provide taxpayers with an election to allocate income and loss between the periods ending with and after the change date on the basis of a closing of their books as of the change date (rather than on the basis of a ratable allocation). The purpose of this regulations project is to implement the above mentioned portion of Notice 87-79 and to provide guidance in certain related areas. The regulation will also provide for mandatory exclusion of extraordinary items from the ratable allocation of income or loss between the pre-change and post-change periods, in the absence of a closing of the books election. Such extraordinary items will be allocated on the basis of a closing of the books.

3186. TAXATION OF SETTLEMENT FUNDS

Significance: Agency Priority

Legal Authority: 26 USC 468B Internal Revenue Code of 1986

CFR Citation: 26 CFR 1

Legal Deadline: None

Abstract: If a liability requires payment to another person and arises out of tort, the obligor is permitted a deduction only as payments are made to such person. See IRC Section 461(h)(2)(c). The obligor is not permitted to accrue a deduction when it makes payment to a settlement fund; rather, it is permitted to accrue a deduction only as payments are made from the settlement fund to the person to which the liability is owed. IRC Section 468B provides that under certain limited circumstances a payment to a settlement fund in respect of tort liability is deductible by the obligor. The provision applies only to payments made to a designated settlement fund. The regulations will address the taxation of a designated settlement fund along with escrow accounts and other similar funds. Under prior law, income earned on amounts deposited in settlement funds were not subject to tax until distribution to the claimants. See Rev. Rul. 71-119, 1979-1 C.B. 103; Rev. Rul. 70-567, 1970-2 C.B. 133. (cont)

3207. PARTNERSHIP TERMINATION DISTRIBUTIONS

Significance: Agency Priority

Legal Authority: 26 USC 708 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1.708-1

Legal Deadline: None

Abstract: In order to prevent the shifting of the tax consequences between partners with respect to pre-contribution gain or loss Congress amended section 704(c) of the Code in the Tax Reform Act of 1984 and again in the Revenue Reconciliation Act of 1989. Treasury believes that in order to fully implement the Congressional intent, the regulations under section 708(b)(1)(B) of the Code need to be amended to insure that the pre-contribution gain or loss is properly accounted for when a partnership liquidates and is reformed. Accordingly, it has been proposed that the regulations under section 708(b)(1)(B) be amended to insure that the pre-contribution gain or loss will be preserved in the liquidation reformation process.

Abstract: Provision would amend section 1.1502-3 of the regulations when dealing with the transfer of section 38 property between members of an affiliated group. Currently section 1.1502-3(f)(2) provides that a transfer of section 38 property between members is not a "disposition" within the meaning of section 47 of the Code. The area of concern has been sales of section 38 property outside the group immediately after the transfer. The amendment to section 1.1502-3(f)(2) would incorporate the holding in Rev. Rul. 82-20, 1982-1 C.B. 6 which would require recapture.

Legal Authority: 26 USC 7805 Internal Revenue Code of 1986; 26 USC 1502 Internal Revenue Code of 1986

CFR Citation: 26 CFR 1.1502-32 (T)

Abstract: When a subsidiary declares a dividend while a member of a consolidated group, but pays the dividend after disaffiliation from the consolidated group, the basis of the subsidiary's stock is not reduced by the amount of the dividend. The problem is caused by a difference in timing of the two events (declaration of dividend and payment of dividend) and its effect on earnings and profits and basis. This regulation will alleviate the problem by providing that basis of the subsidiary's stock will be reduced when the subsidiary declares a dividend.

Abstract: The regulations in this project clarify the definition of the term "commodity" for purposes of broker reporting. Generally, the term "commodity" is defined as personal property that is deliverable in satisfaction of a regulated futures contract, certain specified personal property that the secretary determines is to be treated as a commodity or any form or quality of or any interest in such personal property. The term "commodity" does not include a security, regulated futures contract, forward contract, or a form of tangible personal property if the gross proceeds from its sale exceed by more than 15 percent its value as a commodity. The rules proposed include alternative methods (the "exact" and "approximate" methods) of tangible personal property valuation.

Abstract: Section 7429 currently provides for administrative and judicial review of jeopardy assessments, but these review procedures do not apply to jeopardy levies. The Technical and Miscellaneous Revenue Act of 1988, PL 100-647, Sec. 6237, extends the review procedures of Section 7429 to the review of jeopardy levies and provides concurrent jurisdiction to the Tax Court with Federal District courts with respect to actions challenging a jeopardy assessment or jeopardy levy, provided a Tax Court petition is filed prior to the making of the assessment or levy. The regulations incorporate the statutory amendments that modify IRC S. 7429 and in addition, extend review to include all jeopardy levy cases in which the general notice requirements of IRC S. 6331(a) and (d) are not met.

Legal Authority: PL 100-647, Sec 6240; 26 USC 7805

CFR Citation: 26 CFR 301.7432

Abstract: The new section 7432 grants taxpayers the right to bring a cause of action for damages in Federal District court if any officer or employee of the Internal Revenue Service knowingly or negligently fails to release a lien under section 6325 on property of the taxpayer. Damages will not be awarded for failure to release a lien unless the court determines that the taxpayer has exhausted all administrative remedies within the Internal Revenue Service. The Secretary must provide by regulations a reasonable procedure for the taxpayer to notify the Service of a failure to release a lien on property of the taxpayer. Currently, we are considering regulations that will provide procedures for a taxpayer to notify the Service of a failure to release a lien and procedures for administrative exhaustion of remedies.

The new implementing regulation will establish administrative remedies for taxpayers to meet the statutory requirement that administrative remedies be exhausted prior to a court award of damages. Abstract: The temporary regulations which are cross-referenced in this notice of proposed rulemaking provide guidance as to what is reasonable under the circumstances in the case-by-case determination as to the time and place of examination. The regulations balance the convenience of the taxpayer with the requirements of sound and efficient tax administration. The regulations provide that it is generally not reasonable for the IRS to require a taxpayer to attend an examination at an IRS office other than the office located closest to the taxpayer's home in that district. They also provide that it is generally not reasonable for the IRS to audit a taxpayer at his or her place of business if the business is so small that so doing will eventually require the taxpayer to close the business.

3391. REQUIRED CAPITAL LEVELS FOR SAVINGS ASSOCIATIONS; REGULATORY INTERVENTION

Significance: Agency Priority

Legal Authority: 12 USC 1464

CFR Citation: 12 CFR 567

Legal Deadline: None

Abstract: The OTS is addressing whether to amend the minimum regulatory capital regulations for savings associations to add specific language defining a particular level of capital as an "unsafe and unsound condition to transact business including having substantially insufficient capital" for the purpose of activating the OTS's statutory authority to appoint a conservator or receiver. The advance notice of proposed rulemaking set the floor capital requirements at a level of 1.5 percent of total assets, to be held in the form of core equity capital. The OTS is currently developing a notice of proposed rulemaking in this area which would also define "insolvency".

Abstract: The OTS has proposed a comprehensive regulation to fundamentally alter the function of applications and their processing within the framework of OTS's role in the thrift industry.

The rule would (i) streamline existing applications and notice requirements for a number of transactions and activities; (ii) establish standard and expedited application and notice processes that would improve the ability of institutions with satisfactory MACRO, Community Reinvestment Act and Compliance ratings to engage in certain new activities while discouraging applications to engage in new activities by those with lower ratings, unless the proposed activity would clearly improve their condition and performance; and (iii) substitute the application requirements for some activities with a notice requirement.

Abstract: The OTS has adopted an interim rule amending its regulations concerning minimum capital requirements for all savings associations as required by FIRREA. One purpose of the rule is to ensure that savings associations engaging in higher risk activities are adequately capitalized. The rule includes requirements for minimum levels of tangible, core, and total capital.

In connection with this rule, the Bank Board as predecessor to the OTS proposed a description of methodologies to be used in calculating the interest rate risk component of the rule in the form of an advance supplemental notice of proposed rulemaking. The OTS has also formulated a notice of proposed rulemaking in this area.

In addition, the OTS has adopted a proposal which would clarify and remove obsolete or incorrect references in its interim final rule concerning minimum capital requirements.

Abstract: The OTS has adopted a notice of proposed rulemaking to amend its minimum regulatory capital regulations by revising the leverage ratio requirement to be no less stringent than the leverage ratio adopted by the Office of the Comptroller of the Currency.

This proposal was adopted pursuant to section 301 of FIRREA, which requires that the OTS promulgate capital standards that are uniformly applicable to all savings associations. 12 U.S.C. 1464(t).

The proposal establishes a 3.0% leverage ratio for savings associations in the strongest financial and managerial condition. All other savings associations would be required to maintain minimum ratios of 4.0%.

Abstract: Agencies are authorized to restrict the testimony of their employees in private litigation. The Department of Veterans Affairs also needs to conserve Government resources in the same manner as other agencies which have regulations to restrict their employees from testifying in private litigation. This regulation would provide for this authority and would further the Department's mission of assisting all veterans by conserving personnel resources for official duties and controlling utilization of Government personnel for testimony in purely private controversies.

Legal Authority: 38 USC 210(c)(1)

CFR Citation: 38 CFR 2.1

Legal Deadline: None

Abstract: Cases have held that the head of an agency may not lawfully delegate to, or expand the authority to subpoena documents of, the Offices of Inspector General established under the Inspector General Act. (The VA Inspector General was established under that Act.) Thus, the delegation of subpoena authority under 38 CFR 2.1 does not comport with law and should be changed. Current regulations do not specify the method of service. This amendment would rescind this delegation and incorporate into 38 CFR 2.1 information on methods of service of administrative subpoenas, as other agencies do on exercising subpoena power. It would provide needed guidance to VA officials and the public on proper service of subpoenas.

Abstract: Section 208 of Public Law 94-581 provides that unclaimed property or funds and effects left by a dependent or survivor of a veteran receiving medical care at a Department of Veterans Affairs facility as a CHAMPVA beneficiary will be disposed of in the same or similar manner as such property left by a veteran. Also, estates of dependents or survivors of a veteran who dies intestate and without legal heirs while a patient in any Department of Veterans Affairs facility or any hospital, while being furnished care or treatment therein by VA will escheat to the U.S. Government. Some of these regulations have not been updated since 1948, therefore, editorial changes will be made which will not affect policy.

Abstract: The existing means test regulations require VA's Veterans Health Services and Research Administration (VHS&RA) to determine income for means test purposes in the same manner as income is determined for VA pension purposes. VHS&RA is proposing to change its income determination methodology to one that is similar to the method used for VA pension. This change would allow VHS&RA to simulate VA's Veterans Benefits Administration's (VBA's) income determination without having to hire additional staff. The change is a more liberal interpretation of the existing rules for income determination During a technical revision to the prosthetic regulations, they were inadvertently substantively changed by deleting authority to provide prosthetic appliances to certain veterans. This error will be corrected.

Abstract: A number of regulatory changes will be proposed for the VA manufactured home loan program. VA would conform to HUD's practices on certifications, invoicing and volume rebates. Lenders would be permitted to file claims upon receipt of the VA's resale price and thereafter retain the profit or loss which results from subsequent sale of the home. Broader insurance coverage would be required to cover missing items at repossession. Actual freight costs would be allowed in the invoice, and the amounts and items which could be included in the loan would be revised. Abstract: Federally appointed fiduciaries are not required, except under very specific circumstances, to divulge non-VA income and assets belonging to the incompetent beneficiary. It is difficult to assess whether the fiduciary is using the beneficiary's VA assets appropriately unless placed in the context of total income and assets available. The purpose of these changes is to lessen the potential for fraud, waste and abuse. 38 CFR 13.58(b)(2) and 13.59(a) detail the responsibilities of legal custodians and court-appointed guardians respectively. They would be amended to require the reporting of non-VA assets. 38 CFR 13.100(a)(1) defines the authority of the Veterans Services Officer to supervise fiduciaries. The intended change would permit the Veterans Services Officer to request non-VA financial information from fiduciaries. 38 CFR 13.102(b) and 13.104(b) define the accountability of legal custodians and court-appointed guardians respectively. The intended change requires disclosure of non-VA financial information.

Abstract: This proposed change would eliminate provisions under which a service-disabled veteran in the vocational rehabilitation program could elect payment of subsistence allowance at the chapter 34 educational assistance rate. VA may not pay an allowance at the chapter 34 educational assistance rate for training taken after December 31, 1989. VA rules implementing this provision of law also bars the election of subsistence allowance at the chapter 34 educational assistance rate after that date. The intended effect of this change is to update VA regulations by removing all provisions for election of subsistence allowance at the chapter 34 rate or payment at that rate.

Abstract: The Persian Gulf War Veterans' Benefits Act of 1991 provides increases in the full-time, three-quarter-time and half-time rate of educational assistance payable to someone pursuing a program of education under the Montgomery GI Bill - Selected Reserve. Abstract: The law provides that rates of subsistence allowance and educational assistance payable under the Educational Assistance Test Program shall be adjusted annually based upon the average actual cost of attendance at public institutions of higher education in the twelve-month period since the rates were last adjusted. After consultation with the Department of Education, the Department of Defense has concluded that these rates should be adjusted by 6 percent for the 1990-91 school year. The regulations dealing with these rates must be adjusted accordingly.

Abstract: Pub. L. amended 38 USC 3101 to authorize offset from VA compensation and pension benefits payments to recover outstanding debts owed by veterans to the military services. The current 38 CFR 1.912a contains only a reference to 38 USC 3101(c) and must be amended to add further procedures. Pub. L. 101-552 amended 31 USC 3711(a) to allow all agencies to compromise, suspend, or terminate collection action on debts where the amount, exclusive of interest, administrative costs and penalties does not exceed $100,000. This is an increase from the existing $20,000 limit. Therefore, the reference to $20,000 found in both 38 CFR 1.930 and 1.940 must be changed to $100,000.

Abstract: 38 CFR 13.70 defines the conditions under which the Veterans Services Officer may recommend an apportionment of benefits to dependents. The proposed amendment will clarify these conditions. The amendment will also remove a reference to mental illness as the sole criteria for a rating of incompetency.

38 CFR 13.71 is to be amended to make clear that the signing of an institutional award agreement does not waive an institution's right to claim payments under 38 USC 641. This action is the result of an unpublished General Counsel opinion.

38 CFR 13.74 is based on the provisions of 38 USC Sec. 3203(b) (1)(A); however, where the law refers to more than one type of institutional care, the regulation refers only to instances of hospitalization. This would seem to preclude application of the regulation when veterans are in State run nursing homes or other institutions operated by the United States or a political subdivision. The Department of Veterans Affairs, therefore, proposes to correct this defect by substituting the terms "institution" and "institutionalization" where appropriate.

Legal Authority: 38 USC 3301(f)

CFR Citation: 38 CFR 1.519

Abstract: VA is amending the existing regulations concerning VA lists of names and addresses and is also proposing administrative procedures to use when these lists are used for purposes not authorized by law. This action results from the need to amend the regulations to reflect current procedures, organizational changes, and concern expressed by veterans and some service organizations regarding unsolicited mail. The proposed regulatory amendments will allow VA to enforce its statutory duty to protect the privacy of information concerning veterans and their dependents, establish procedures to suspend recipients who misuse VA name and address lists of veterans/dependents, and give advance notice to recipients of what constitutes an authorized/unauthorized use of veterans/dependents names and address lists, thereby protecting the due process rights of any recipient before penalties are enforced.

Abstract: The regulation will increase the fees charged to requesters of information to better reflect the cost to the Government of locating and copying the documents requested. Copying charges would be increased from $0.10 to $0.13 per page; fees for searches by professional staff from $2.00 to $4.65 per quarter hour; and fees for searches by clerical staff from $1.00 to $2.30 per quarter hour. Semiannual Agenda of Regulations

AGENCY: U.S. Commission on Civil Rights.

ACTION: Publication of semiannual agenda.

SUMMARY: This agenda announces the regulations the U.S. Commission on Civil Rights will have under development during the 6-month period from October 1, 1991, through March 31, 1992. The purpose for publishing this agenda is to give notice of any regulatory activity by the Commission in order to allow the public an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: For further information on any items in the agenda, contact: Emma Monroig, Solicitor, U.S. Commission on Civil Rights, Room 604, 1121 Vermont Avenue NW., Washington, DC 20425, (202) 376-8375.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 "Federal Regulation" and the Regulatory Flexibility Act (5 U.S.C. 605), executive agencies are required to publish in the **Federal Register** semiannual regulatory agendas in April and October of each year.

The regulations being considered by the Commission are not "major" rules within the meaning of E.O. 12291, and no Regulatory Impact Analysis is required. The Commission has determined that the regulations under consideration will not impose compliance costs or reporting burdens on the public nor will the regulations have a significant economic impact on a substantial number of small entities. Accordingly, no Regulatory Analysis is required.

Emma Monroig,

Solicitor.

Environmental Protection Agency

Semiannual Regulatory Agenda

ENVIRONMENTAL PROTECTION AGENCY (EPA)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Ch. I

[FRL-3996-7]

Regulatory Agenda

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA revises and issues the regulatory agenda semiannually. The agenda appears in the **Federal Register** each April and October and is intended to keep interested parties informed of the progress of EPA regulations. It provides specific information on the status of regulations that are under development, revision, and review at the Agency.

ADDRESSES: If you want to be on the mailing list for future agendas, please write or call Bridgette Dent, Regulation Development Branch, EPA, PM-223Y, Washington, DC 20460, (202) 260-5475.

If you have suggestions for improving this publication or need general information about the agenda, please write or call Anthony Britten, Regulation Development Branch, EPA, PM-223Y, Washington, DC 20460, (202) 260-5251.

FOR FURTHER INFORMATION CONTACT: For information about a specific item in the agenda, contact the person listed with each entry.

SUPPLEMENTARY INFORMATION: The agenda provides the title, an abstract, legal authority, CFR reference, any analysis EPA is preparing, contact person, and schedule for completing the action for each regulation under review. The following statutes are covered in the agenda:

Asbestos Hazard Emergency Response Act (AHERA)
Atomic Energy Act (AEA)
Clean Air Act (CAA)
Clean Water Act (CWA)
Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)
Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA)
Federal Food, Drug, and Cosmetics Act (FFDCA)
Hazardous and Solid Waste Amendments (HSWA)
Marine Protection, Research, and Sanctuaries Act (MPRSA)
Resource Conservation and Recovery Act (RCRA)
Safe Drinking Water Act (SDWA)
Superfund Amendments and Reauthorization Act (SARA)
Toxic Substances Control Act (TSCA)
Water Quality Act of 1987 (WQA)
General - (Other acts including grant and procurement regulations that cut across several program areas)

It also indicates the "review authority," which may be different from the regulation's statutory authority. EPA reviews regulations under various mandates, and some reviews satisfy more than one of these mandates. The principal mandates are:

Executive Order 12498 requires agencies to submit entries for the Administration's annual "Regulatory Program." It defines priority activities that Federal departments and agencies will work on during the upcoming year. Its purpose is to minimize duplication and conflict among regulatory activities and enhance public understanding of the Administration's regulatory objectives.

Executive Order 12291 establishes the general policy that Federal departments and agencies should review their regulations to ensure that the costs of the regulations are justified by their benefits. The Office of Management and Budget (OMB) reviews agency rules to assess their compliance with the Executive order's goals of maximizing net social benefits.

The Regulatory Flexibility Act (RFA) requires the designation of those regulations for which a Regulatory Flexibility Analysis will be prepared; i.e., those regulations that would have a significant impact on a substantial number of small entities. EPA invites public comment regarding RFA issues on the list of regulations EPA is currently developing. Reviews that EPA has targeted under the RFA are identified under "Analysis." The agenda identifies the types of entities affected under "Small Entities Affected." The "Government Levels Affected" (i.e., State, local, or Federal) is also indicated.

The RFA requires that Federal departments and agencies review existing regulations that have a significant economic impact on a substantial number of small entities at least once every 10 years. EPA is in the process of compiling a list of existing regulations to be reviewed and invites public comment identifying any rules that should be added to the list; i.e., that have a significant economic impact on a substantial number of small entities. Comments should be provided in the following format:

- Title
- Authorizing statute and CFR citation
- Description of economic effects on small entities, especially on the commenting person or organization
- Recommendations for changes

Any additional detailed comments or data are welcome.

When the Agency completes its reviews, it will indicate in the agenda whether it will revise or rescind such regulations. This announcement complies with the RFA and EPA's July 16, 1981, plan (46 FR 36930) for reviewing regulations under the Act.

The Paperwork Reduction Act (PRA) requires Federal departments and agencies to review their information collection activities to assure that they need and will use the information and manage it efficiently. They must also ensure that the information to be collected is of high quality, appropriate for its intended use, and does not already exist at some other Federal agency. In addition, the PRA requires agencies to minimize the cost of collecting the information for both the respondent and the agencies. Congress gave oversight authority to OMB. EPA must have OMB approval before it either collects information or requires that information be collected.

Organization of the Agenda

The agenda is organized by statute and ordered numerically within each statutory area. Entries within each statute are divided into four categories: (1) Prerule, (2) proposed rule, (3) final rule, and (4) completed actions (i.e., regulations that EPA is deleting from the agenda because the Agency has completed, withdrawn, or postponed them indefinitely). Detailed information on each of these categories is presented below.

I. Prerulemakings

Prerulemaking actions are activities intended to determine whether to initiate rulemaking. These activities include anything that influences or leads to rulemaking, such as advance notices of proposed rulemaking, significant studies or analyses of the possible need for regulatory action, requests for public comment on the need for regulatory

action, or important pre-regulatory policy proposals.

This section also includes review of existing EPA regulations. The purpose of such reviews is to determine whether the Agency should revise, rescind, or leave the existing rule unchanged. If EPA decides to revise or rescind an existing regulation, that action will appear in the next agenda in the proposed rule section along with a timetable for completing the revision or rescission.

II. Proposed and Final Rules

This section includes all "significant" EPA regulations. Some are priority regulations under development that are subject to Executive Order 12498 or that the Agency has designated for priority development or revision. These regulations are also subject to certain provisions of E.O. 12291, RFA, and PRA. EPA generally lists regulations in this category of the agenda once they are within a year of proposal or promulgation. Very important regulations under development will usually appear even if the scheduled publication dates are more than a year away. However, the listings exclude (a) specialized categories of actions (e.g., EPA approvals of State plans and other actions that do not apply nationally) and (b) routine actions (e.g., pesticide tolerances and minor amendments to existing rules).

III. Completed Actions

These are actions that appeared in the previous agenda, which EPA is deleting because they are completed or are no longer under consideration for rulemaking. Information on these regulations is less detailed than for those that are still under consideration.

Dated: September 5, 1991.

Deputy Assistant Administrator, Office of Policy, Planning, and Evaluation.

3554. TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES OR PROCESSED FOODS

Significance: Regulatory Program

Legal Authority: 21 USC 346(a)/FFDCA 408; 21 USC 348/FFDCA 409

CFR Citation: 40 CFR 177 to 180; 40 CFR 185 to 186

Legal Deadline: None

Abstract: This rule will set the criteria, interpretations, and categorizations the Agency will follow in establishing tolerances and food additive regulations under Sections 408 and 409 of FFDCA (USC 348) for pesticide residues in or on raw agricultural commodities (RAC's) or processed

foods. These regulations will restate, update, and/or clarify practices that have been developed over many years, some of which have never been codified.

Significance: Regulatory Program

Legal Authority: 7 USC 136a/FIFRA 3; 7 USC 136w/FIFRA 25; 7 USC 136c/FIFRA 5

CFR Citation: 40 CFR 152.20

Legal Deadline: None

Abstract: EPA is considering the need to clarify whether certain pesticides produced by or within transgenic plants may not be exempt from the provisions of FIFRA (the existing Section 152 has been interpreted as exempting from FIFRA regulation all plants that may be used as biological pest control agents). Pesticides produced by transgenic plants may receive regulatory oversight similar to that which is already in place for conventional pesticides; however, some modification to the oversight system may be appropriate to reflect the unique characteristics of these products. This regulation and its development will be coordinated with USDA/APHIS, FDA, and other agencies, as appropriate.

Significance: Regulatory Program

Legal Authority: 7 USC 136 /FIFRA 3, 4, 5, and 25

CFR Citation: 40 CFR 158

Legal Deadline: None

Abstract: This amendment will update the existing data requirements (40 CFR 158) for evaluating the registrability of pesticide products. Reasons for the revisions include recent health and environmental concerns (e.g., groundwater contamination, worker exposure and neurotoxicity) and advancements in testing technology. The revisions will clarify data requirements to reflect current practice. Also, comparative product performance data requirements for use in risk/benefit analysis and in preparation of regulatory options used in making analysis and in preparation of regulatory options used in making risk/benefit decisions will be incorporated into 40 CFR 158. Procedural and explanatory sections of 40 CFR 158 will amended to make them consistent with the revised data requirements.

Significance: Regulatory Program

Legal Authority: 7 USC 136a/FIFRA 3; 7 USC 136c/FIFRA 5

Abstract: EPA proposes to amend its experimental use permit regulations for pesticides to clarify the circumstances under which an experimental use permit is presumed not to be required and the basis for that presumption. EPA also proposes to require notification to the Agency before initiation of small-scale testing of certain microbial pesticides. The Agency will review each notification to assess the potential for adverse impacts on human health or the environment and will then determine whether or not to approve the test, and/or whether to require an experimental use permit. This notification scheme would implement provisions of the Agency policy statement of June 26, 1986 (51 FR 23302), with some modifications.

Legal Authority: 7 USC 136d/FIFRA 6

CFR Citation: 40 CFR 153

Abstract: FIFRA Section 6(a)(2) requires that registrants report to EPA additional factual information regarding unreasonable adverse effects of their products. In September 1985, EPA revised its 1979 section 6(a)(2) enforcement policy by publishing a notice which expanded upon the types of factual information which must be reported and established uniform timeframes for compliance. In response to comments received on this notice, the Agency is reissuing it as a proposal to clarify the types of information which registrants must report to EPA.

Abstract: Pesticides are necessary for production of agricultural food and fiber commodities, yet have the potential to harm threatened or endangered species. EPA will develop and implement an endangered species pesticide labeling program designed to conserve federally listed species and to minimize the impacts to persons who use pesticides. The program will include development of species maps and pesticide use limitation bulletins to be distributed as an extension of pesticide labels. Pesticides that are determined to cause harm to endangered species will require label changes which display precautionary statements and directions on how to obtain county bulletins. The program will be coordinated with EPA, US Department of Agriculture, and States.

CFR Citation: 40 CFR 799

Legal Deadline: None

Abstract: This action would create a Master Testing List (MTL) of chemicals potentially subject to testing under Section 4 of the Toxic Substances Control Act (TSCA). The MTL would define the universe of data needs for chemicals, provide for government-wide and public participation to determine national testing priorities priorities, and use scarce national resources wisely to develop only the highest priority data needs. The MTL would provide a vehicle for resolving testing issues including developing standard test guidelines, measuring program success, and encouraging cost sharing. The MTL would be announced to the public, and updated periodically.

Legal Authority: 42 USC 11023 /EPCRA 313; 42 USC 11048; 42 USC 11076

CFR Citation: 40 CFR 372

Legal Deadline: None

Abstract: This action would add seventeen chemicals to the list of toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA). Sixteen of these chemicals are from a list of hazardous air pollutants subject to requirements of the Clean Air Act Amendments of 1990. Most of these hazardous air pollutants are already covered by Section 313 reporting including some categorical listings. Adding these chemicals will establish a Comprehensive Inventory of Air Toxics Releases and will also provide information on releases of these chemicals to other environmental media. The seventeenth chemical is to be added because it is extremely toxic to aquatic organisms.

Legal Authority: 42 USC 11013/SARA (EPCRA) 313

CFR Citation: 40 CFR 372

Legal Deadline: None

Abstract: This action proposes to add a "peak release" reporting element to the Toxic Chemical Release Inventory (TRI) Reporting Form. Current reporting of releases is of annual releases to all environmental media. The proposal addresses the issue of obtaining more specific information on the highest single release in order to better assess acute risks to health and the environment. This action is being considered in the context of expansion of TRI coverage chemicals and of standard industrial classification (SIC) codes. Decisions made on major expansions will determine when and how EPA will proceed on this "Peak Release" rule.

3581. POLICY STATEMENT IMPLEMENTING THE PRIOR INFORMED CONSENT PROCEDURES FOR THE EXPORT/IMPORT OF INDUSTRIAL CHEMICALS

Legal Authority: London Gdlns for Exchange of Info on Chemicals in Intl Trade

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The EPA intends to publish a proposed policy statement implementing the Prior Informed Consent (PIC) procedure for industrial chemicals. The principle of PIC was accepted by the United National Environment Programme (UNEP) as an amendment to the London Guidelines for the Exchange of Information on Chemicals in International Trade. The US is a member of UNEP and a signatory to the Guidelines. Hence, EPA is preparing this policy statement to further comply with the London Guidelines, specifically the provisions of the PIC procedure.

The goal of the Guidelines is to enhance the safe management of chemicals in all countries through the exchange of scientific, technical, economic, and legal information on chemicals in international trade. The policy statement will provide the current proposed list of industrial chemicals banned or severely restricted in the US which will include chemicals subject to regulatory action taken by agencies other than EPA. OTS believes this policy statement will establish a mechanism for information exchange which will advance the protection of human health and the global environment.

The list includes chemicals which have been designated for priority testing consideration by the Interagency Testing Committee as well as those chemicals (i.e., recommended and non-designated chemicals) for which the 12-month statutory requirement does not apply. The list also includes chemicals or categories of chemicals which have been identified for testing consideration by other EPA program offices and through EPA review processes.

Significance: Regulatory Program

Legal Authority: 15 USC 2603 /TSCA 4

CFR Citation: 40 CFR 799.5050

Legal Deadline: None

Abstract: A multi-chemical endpoint test rule will require the testing of many chemicals for a specific effect or endpoint, e.g., bioaccumulation. This type of rule is an alternative to single chemical rules which require testing of one chemical for many effects. The multi-chemical endpoint rule approach will obtain testing while conserving on Agency resources. The multi-chemical rule for persistent bioaccumulators will obtain environmental effects and chemical fate data on chemicals that are believed to persist and bioaccumulate in the environment. Emerging environmental concerns have focused on sediments contaminated with chemicals which are persistent (do not degrade) and bioaccumulate (may enter the human food chain). In addition, such chemicals are also typically toxic to aquatic and terrestrial organisms. EPA has identified over 30 chemicals for possible inclusion in the bioaccumulator test rule. EPA is also considering developing a multi-chemical test rule to obtain needed health and environmental effects testing for the 189 chemicals listed under Section 112 of the Clean Air Act (CAA). Another multi-substance test rule may be developed to (cont)

Significance: Regulatory Program

Legal Authority: 15 USC 2604 /TSCA 5

CFR Citation: 40 CFR 700; 40 CFR 720; 40 CFR 721

Abstract: EPA is planning to propose a regulation under TSCA for the oversight of certain microbial products of biotechnology. The proposed rule would be issued under the authority of Section 5 of TSCA, which generally requires that new chemical substances must be reviewed by EPA before they are introduced into commerce. EPA will consider the "Principles for Federal Oversight of Biotechnology: Planned Introductions Into the Environment of Organisms with Modified Hereditary Traits."

The proposed rule may include procedures for oversight of certain new organisms manufactured for general commercial use, and may propose a special notification procedure for new microorganisms introduced into the environment for research and development (R&D) purposes. Legal Authority: 15 USC 2604; 15 USC 2607; 15 USC 2613 /TSCA 5

CFR Citation: 40 CFR 720 to 723

Legal Deadline: None

Abstract: This action will amend the PMN rules (40 CFR 720 to 723) under Section 5 of the Toxic Substances Control Act (TSCA) to conform to current policy needs. These changes are necessary to increase efficiency and incorporate proposed program improvements. They are expected to reduce the administrative burdens/cost of the New Chemicals Program and the overall number of Section 5 submissions while maintaining an effective and environmentally sound program. EPA has identified "low-risk" categories that meet certain established criteria and can be screened out of the full PMN review process at an early date based on low health/environmental concern or low exposure scenarios. EPA would like to reduce the burden to PMN submitters and maximize the efficiency and resources of the program by modifying the rule to reduce reporting requirements for low risk categories. This would enable the Agency to reduce the number of Section 5 submissions and concentrate its resources on PMNs with potential health or environmental concerns.

Significance: Regulatory Program

Legal Authority: 15 USC 2604/TSCA 5; 15 USC 2605/TSCA 6

CFR Citation: 40 CFR 721; 40 CFR 750

Abstract: This action initiates a regulatory investigation under the Toxic Substances Control Act (TSCA) Sections 5 and 6 to determine the most cost-beneficial way to reduce human exposure to lead (Pb). Under the first phase of the regulatory investigation EPA has published, the investigation will also involve examination of the potential sources of human exposure to lead throughout the life cycle and determination of unreasonable risks. Based on information gathered, EPA may propose TSCA Section 6(a) rules to restrict or phase-out high exposure Pb uses, and a TSCA Section 5(a)(2) significant new use rule (SNUR) for Pb to prevent exposure to Pb via regulatory economic incentives designed to encourage the use of less hazardous substitutes and recycling whenever cost-effective.

Abstract: EPA has instituted a program to regulate the commercial development of new chemicals that have completed premanufacture notice (PMN) review where activities described in the PMN did not present an unreasonable risk but uncontrolled manufacture, import, processing, distribution, use, or disposal outside the activities described in the PMN may present an unreasonable risk. EPA will issue Significant New Use Rules (SNURs) requiring 90-day notification to EPA from any manufacturers, importer, or processor, who would engage in that are designated as significant new uses. Under the Expedited Follow-Up rule (EFUR), effective on October 12, 1989, EPA will identify such new chemicals and publish them in a batch SNUR 6-12 times per year. Chemicals that were subject to a proposed SNUR before the effective date of the EFUR or do not qualify under the EFUR may be regulated individually by notice and comment rulemaking.

Significance: Regulatory Program

Legal Authority: 15 USC 2605 / TSCA 6; 15 USC 2608 / TSCA 9

CFR Citation: 40 CFR 765

Legal Deadline: None

Abstract: As described in the Federal Register on May 23, 1984, the Agency has been investigating regulatory options for reducing the exposure to formaldehyde of: (1) residents exposed to formaldehyde emissions from wood products used in the construction of manufactured homes; (2) similarly exposed residents of conventional homes; and (3) apparel manufacture employees exposed to formaldehyde released from treated fabrics. When the Occupational Safety and Health Administration (OSHA) proposed a revised workplace standard in December 1985 that applies to all occupational exposure, EPA terminated its investigation with respect to apparel manufacturing employees. An investigation of risks from exposure to formaldehyde emissions from wood products is being conducted in consultation with the Department of Housing and Urban Development (HUD) and the Consumer Product Safety Commission (CPSC). Toxic Substances Control Act (TSCA) section 6 regulations may be developed to address certain pressed wood products that contain urea formaldehyde resins.

Significance: Regulatory Program

Legal Authority: 15 USC 2605(e)(1)(A) /TSCA 6(e)

CFR Citation: 40 CFR 761, Subpart C, D, E, G

Legal Deadline: None

Abstract: The ANPRM solicits comments on alternate disposal methods for non-liquid PCBs and invites public input on modifications to the PCB disposal regulations. In February 1990, several parties petitioned EPA under Section 21 of TSCA to amend the regulations at 40 CFR 761, which govern the disposal of PCBs, and issue an interpretive rule or declaratory order construing the existing PCB disposal regulations. In responding to the petition, EPA agreed to initiate a regulatory investigation to determine whether or not to amend the disposal regulations. After analyzing the comments received in response to the ANPRM, a proposed rule will be drafted which will also address alternative disposal methods for newly identified scenarios such as large volume solids; mixed wastes such as PCB/radioactive wastes; and items not previously contemplated by the PCB regulations, such as household wastes, small capacitors, and used paints. This notice will also solicit comments on permitting, compliance monitoring and enforcement activities for PCBs conducted by various state environmental agencies under state laws and regulations.

Significance: Regulatory Program

Legal Authority: 15 USC 2605 /TSCA 6

CFR Citation: Not yet determined

Abstract: As part of its Existing Chemical Program revitalization, the Office of Toxic Substances is developing a rule requiring Environmental Hazard Communication (EHC) with the sale of commercial chemicals. As currently envisioned, the EHC rule would supplement the Occupational Safety and Health Administration's (OSHAs) Hazard Communication Rule with "environmental" requirements. The rule may require that environmental information be included on Material Safety Data Sheets, to the extent that environmental testing has been performed. The rule would not require testing to be performed if data were not available. The information could include the following: toxicity data, environmental fate data, use handling, transportation and disposal recommendations, and significant regulatory information. In addition, the EHC rule could require environmental labeling and/or training to supplement OSHA's requirement. Costs have not yet been determined.

3597. AMENDMENT TO THE TSCA SECTION 8(A) COMPREHENSIVE ASSESSMENT INFORMATION RULE (CAIR)

Legal Authority: 15 USC 2607(a)/TSCA 8(a)

CFR Citation: 40 CFR 704 (Revision)

Legal Deadline: None

Abstract: This proposed rule will amend certain aspects of the CAIR. The CAIR is a model rule designed to gather production, use, and exposure information from chemical manufacturers, importers, and processors of listed chemical substances and mixtures. In response to public comments, EPA is considering revision of the CAIR to: establish exemptions for small and "de minimis" volumes; refine trade name reporting requirements; reduce certain advance substantiation requirements for Confidential Business Information (CBI) claims; and define processing activities using processor subclasses.

Legal Authority: 15 USC 2604 /TSCA 5; 15 USC 2607 /TSCA 8

CFR Citation: 40 CFR 704; 40 CFR 721

Legal Deadline: None

Abstract: EPA has instituted a program to monitor the commercial development of existing chemicals of concern and/or to gather information to support risk assessments on such chemicals. As these chemicals are identified, EPA will initiate rulemakings under the Toxic Substances Control Act (TSCA) sections 5 and/or 8 to require reporting by the manufacturers, importers and/or processors of these chemicals. Proposed rules may be published on at least the chemicals listed on the timetable below.

3600. MULTI-CHEMICAL ENDPOINT(S) RULE

Legal Authority: 15 USC 2603 /TSCA 4

CFR Citation: 40 CFR 799.5050

Legal Deadline: None

Abstract: A multi-chemical endpoint test rule will require the testing of many chemicals for a specific effect or endpoint, e.g., neurotoxicity. This type of rule is an alternative to single chemical rules which require testing of one chemical for many effects. The multi-chemical endpoint rule approach will obtain a significant amount of testing while conserving on Agency resources. The multi-chemical rule for developmental and reproductive toxicity testing will require testing of twelve chemicals for developmental and/or reproductive effects; the multi-chemical rule for neurotoxicity testing will obtain base set neurotoxicity testing of ten high production solvents. These rules may be amended in the future to require the same testing for other chemicals. Also, future multi-chemical rules will require testing of additional endpoints and chemicals. The testing requirements for each chemical in a multi-chemical rule will be listed in a single table by chemical under Section 799.5050. This table will be amended with each publication of a new multi-chemical rule.

Legal Authority: 15 USC 2603

CFR Citation: 40 CFR 799

Abstract: EPA is proposing its policies for evaluating substantial production, substantial environmental release, and substantial human exposure criteria, set forth in Section 4(a)(1)(B) rulemaking activities. EPA is extending the comment period on three proposed rules affected by this policy.

Legal Authority: 15 USC 2604/TSCA 5; 15 USC 2607/TSCA 8

CFR Citation: 40 CFR 704; 40 CFR 721

Legal Deadline: None

Abstract: EPA has instituted a program to regulate the commercial development of new chemicals that have completed premanufacture notice (PMN) review where activities described in the PMN did not present an unreasonable risk but uncontrolled manufacture, import, processing, distribution, use, or disposal outside the activities described in the PMN may present an unreasonable risk. EPA will issue Significant New Use Rules (SNURs) requiring 90-day notification to EPA from any manufacturer, importer, or processor who would engage in activities that are designated as significant new uses. Under the Expedited Follow-up Rule which became effective on October 12, 1989, EPA will identify such new chemicals and publish them in a batch SNUR 6-12 times per year. Chemicals that were subject to a proposed SNUR before the effective date of the EFUR or do not qualify under the EFUR may be regulated individually by notice and comment rulemaking.

3603. CHEMICAL SPECIFIC SIGNIFICANT NEW USE RULES (SNURS) TO EXTEND PROVISIONS OF SECTION 5(E) ORDERS

Legal Authority: 15 USC 2604/TSCA 5

CFR Citation: 40 CFR 721

Legal Deadline: None

Abstract: When the Agency determines that uncontrolled manufacture, import, processing, distribution, use or disposal of a premanufacture notification notice (PMN) substance may present an unreasonable risk, it may issue a section 5(e) consent order to limit these activities. However, such orders apply only to the PMN submitter. Once the new substance is entered on the Toxic Substances Control Act (TSCA) chemical inventory, others can

manufacture, import or process the substance without controls. Therefore, EPA extends the controls to apply to others by designating manufacture, import or processing of the substances for uses without the specified controls as significant new uses. Under the Expedited Follow-Up Rule, which became effective on October 10, 1989 (54 FR 31314), EPA will publish a batch SNUR 6-12 times each year.

Significance: Regulatory Program

Legal Authority: 15 USC 2605/TSCA 6

Legal Deadline: NPRM, Judicial. Final, Judicial, November 30, 1992.
The Consent Decree between EPA, EDF, and NWF signed July 27, 1988 requires that EPA make best efforts to issue a final rule by November 30, 1992.

Abstract: The objective of this project is to reduce the unreasonable risks posed by dioxins and furans in bleached wood pulp and paper mill industrial sludge. In response to a July 1988 Consent Decree with the Environmental Defense Fund and the National Wildlife Federation, EPA announced on April 30, 1990 its schedule for a proposed rule under the Toxic Substances Control Act (TSCA), addressing the practice of industrial sludge land application (including mine reclamation and distribution/marketing). The Consent Decree required that this rule be proposed by April 30, 1991, and that EPA make its best efforts to issue a final rule by November 30, 1992.

3610. EXPORT NOTIFICATION REQUIREMENTS; CHANGES TO REPORTING REQUIREMENTS

Legal Authority: 15 USC 2111 /TSCA12

CFR Citation: 40 CFR 707

Legal Deadline: None

Abstract: The amendment will change the current annual export notification requirement for exporters of chemicals subject to test rules under Section 4 of the Toxic Substances Control Act (TSCA) to a one-time export notification requirement. Additionally, the amendment will change the current process internally within the Office of Toxic Substances by providing only one notice of export per Section 4 chemical to each importing country, rather than annually.

This change in the regulation will reduce the paperwork burden to EPA and industry while increasing the value of the notifications to importing countries by emphasizing, through continued yearly notifications, exports of chemicals which are of greater concern. Alternative burden reduction mechanisms will be considered including adopting a percentage cutoff for mixtures and requiring one-time

Legal Deadline: Final, Statutory, December 31, 1986.
Date contained in Water Quality Act of 1987

Abstract: On October 4, 1985 the EPA promulgated a final regulation establishing Best Available Technology (BAT) effluent limitations, New Source Performance Standards (NSPS), Pretreatment Standards for Existing Sources (PSES), and Pretreatment Standards for New Sources (PSNS) for the pesticide industry under the Clean Water Act. On July 25, 1986, the final regulation was remanded to the EPA by the Eleventh Circuit Court of Appeals in response to a joint motion filed by the Agency and other parties to litigation challenging the regulation. EPA removed the BAT effluent limitations, NSPS, PSNS, and PSES from the Code of Federal Regulations at the direction of the court and informed the public that the regulation is no longer effective (December 15, 1986; 51 FR 44911). The Best Practicable Technology (BPT) limitations published on April 25, 1978 and September 29, 1978, are still effective. The Agency intends to establish new effluent limitation guidelines and standards for pesticide manufacturers and formulators/packagers under separate rulemaking schedules for each segment.

Judicial deadline (dioxin/furan regulations only): Extension of consent decree deadline being negotiated.

Abstract: EPA will review the existing Best Practicable Technology (BPT) and Best Conventional Technology (BCT) effluent limitations for all 600 mills in the pulp, paper, and paperboard industry, as well as Best Available Technology (BAT), New Source Performance Standards (NSPS), Pretreatment Standards for Existing Sources (PSES), and Pretreatment Standards for New Sources (PSNS) for the 105 mills which bleach chemical pulps. The Agency will determine whether the existing limitations should be revised and whether to regulate dioxins, furans, and other compounds (e.g., chlorinated organic compounds) for the 105 mills.

Significance: Regulatory Program

Legal Authority: 33 USC 1311 /CWA 301

CFR Citation: 40 CFR 414

Legal Deadline: None

Abstract: On October 10, 1989, the US Court of Appeals for the Fifth Circuit remanded a portion of the Organic Chemicals, Plastics, Synthetic Fibers (OCPSF) regulation that was originally promulgated on November 5, 1987 (54 FR 42522). The revocation notice that implemented the provisions of the remand was published on June 29, 1990 (55 FR 26691). The Agency has initiated technical and economic studies to provide the basis for reproposing and repromulgating appropriate limitations in 1993.

In the interim, EPA has proposed amendments to 40 CFR 414 to implement the provisions of settlement agreements negotiated with petitioners during litigation of the OCPSF regulation. The proposed amendments would allow regulatory authorities to establish cyanide limitations and standards based on best professional judgment for elevated levels of non-amenable cyanide that result from the unavoidable complexing of cyanide at the process source of cyanide-bearing waste (cont)

Another amendment proposes to allow regulatory authorities to establish metals limitations and standards to accommodate low background levels of metals in non- "metal-bearing waste streams" that result from corrosion of construction materials or from contamination of raw materials. Abstract: The Waste Treatment Category consists of three groups of facilities: a. Centralized Waste Treaters (CWT) that generally treat aqueous and liquid hazardous and non-hazardous waste; b. hazardous waste incinerators with wet scrubbers; and c. municipal and hazardous waste landfills with leachate collection. The Agency is developing regulations for Waste Treatment facilities in two phases. The Phase I regulation will cover CWT facilities that generally treat aqueous and liquid hazardous and non-hazardous waste. Although the Agency has not yet scheduled a Phase II regulation which would regulate

hazardous waste incinerators and landfill leachate discharges, it plans on collecting screening information in conjunction with the Phase I technical study.

Statutory deadline for EPA to issue biennial notice.

Abstract: In accordance with Section 304(m) of the Clean Water Act, EPA published a biennial plan in the Federal Register for the promulgation of new effluent limitations guidelines and standards and the review and revision of existing guidelines and standards for categories of sources discharging toxic and non-conventional pollutants. Section 304(m) establishes a planning process that sets the Agency's agenda for future effluent guidelines and standards rulemaking. The first notice was published in the Federal Register on January 2, 1990; it describes EPA's plan to prepare new or revised guidelines covering nine industry categories and to conduct pre-regulatory studies for eleven other industries. Subsequent 304(m) notices will identify additional categories for promulgation of new guidelines and revision of existing guidelines.

It will amend the procedures to be used when EPA is considering the use of Section 404(c) of the CWA to prevent the discharge of dredged or fill material into a defined area of the waters of the United States. Section 404(c) gives the Administrator authority to prohibit or withdraw the specification of a site as a disposal site or to deny or restrict use of a disposal site. Abstract: EPA will publish final amendments to 40 CFR Part 130 related to Section 303(d) of the Clean Water Act (CWA). EPA proposed these amendments on January 12, 1989 and reopened the comment period on July 24, 1989. The proposed amendments would require States to submit to EPA the list of water-quality limited waters required under Section 303(d) every two years, and to use the States' Biennial Water Quality Reports required by 305(b) of the CWA as the reporting vehicle. Also, EPA published a final rule in the Federal Register on January 4, 1989, amending 40 CFR Parts 122, 123, and 130. This regulation sets out EPA's interpretation of Section 304(l) of the CWA. Section 304(l) requires the States to list those waters that are adversely affected by toxic, conventional, and nonconventional pollutants. In addition, the regulation requires States to identify the point sources discharging to certain listed waters, and to prepare individual control strategies (ICSs) that will control point source discharges of toxic pollutants. On September 28, 1990, the Ninth Circuit remanded a portion of EPA's regulations. The remand requires EPA to amend its regulations to require (cont)

Legal Authority: 33 USC 1311(h)/CWA 301(h)

CFR Citation: 40 CFR 125

Abstract: The revisions to the regulations primarily are intended to respond to statutory changes made to sec. 301(h) of the Clean Water Act (33 USC 1311(h)), which governs secondary treatment waivers for municipal discharges into marine waters. The statutory changes to be addressed include, among other things, new requirements for minimum treatment levels and additional requirements for pretreatment programs for certain waiver applicants. In addition, the Agency is considering revising the regulations to address more specifically procedures and requirements for the renewal of secondary treatment waivers. The revised regulations will affect only the limited number of municipal treatment plants which met the 1982 statutory deadline for applying for a secondary treatment waiver.

Legal Authority: 42 USC 2201/AEA 161 and Reorganization Plan 3 of 1970

CFR Citation: 40 CFR 191

Legal Deadline: None

Abstract: On August 15, 1985, the Agency promulgated generally applicable environmental standards for the management and disposal of spent nuclear fuel, high-level and transuranic radioactive wastes. These standards applied to management and disposal of such materials generated by activities under the jurisdiction of the Department of Energy or regulated by the Nuclear Regulatory Commission. They established limits for the release of radioactive materials to the environment. Subsequent to promulgation of this rule, several petitions for review were filed and consolidated in the U.S. Court of Appeals for the First Circuit. On September 23, 1987 the Court vacated and remanded Subpart B of the Standards to the Agency for revision consistent with its ruling.

Legal Authority: 42 USC 300f/SDWA 1421 to 1425

CFR Citation: 40 CFR 147

Legal Deadline: None

Abstract: The Safe Drinking Water Act (SDWA) requires EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. EPA is proposing amendments to its Underground Injection Control (UIC) program regulations for the Osage Mineral in Oklahoma (40 CFR 147 Subpart GGG) to allow the Regional Administrator flexibility to waive certain technical requirements for temporary abandoned wells and to designate a portion of the Happy Hollow and Z-Sand aquifers in Western Osage County, Oklahoma as exempted aquifers. The proposed changes will provide the Regional Administrator with the same flexibility that presently exists in the generic Federal regulations (40 CFR 144.28(c)(2)(iv) and 144.52(a)(6)) to waive certain technical requirements applicable to active injection wells upon a demonstration by the owner or operator that the well will not endanger underground sources of drinking water during the period of temporary abandonment.

Abstract: Part C of the SDWA directs EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. The greatest number of injection wells are Class II (oil and gas related) wells operated by the petroleum industry for disposal of produced brines and enhanced recovery projects. EPA is considering proposing standards for all newly constructed or converted (from production operations) Class II injection wells. These standards may establish new or incremental performance criteria to ensure protection of underground sources of drinking water (USDWs).

Abstract: The SDWA requires EPA to develop regulations for the protection of underground sources of drinking water from contamination by injection wells. Previously promulgated regulations specified minimum standards and technical requirements for Class I-IV wells. Class V wells, such as certain septic systems and a variety of drainage wells, are the subject of this action. EPA intends to establish a regulatory framework for the management of these wells that will protect against contamination of groundwater while recognizing the difficulties of this diverse well class. Development of any regulatory program will focus on providing maximum flexibility to state, sub-state, and local entities. EPA will characterize risks associated with various Class V injection wells since data are unavailable for risk assessments on an individual subcategory basis.

Abstract: This proposed revision to Testing and Monitoring Requirements under 40 CFR 146.68(d)(4) was part of a settlement agreement for NRDC vs. EPA DC Circuit No. 88-1657 and Consolidated Cases. EPA agreed to issue a notice of proposed rulemaking to provide that a casing inspection log shall be run whenever the owner or operator conducts a workover in which the injection tubing is pulled. The Director may waive this requirement due to well construction or other factors. The Director may require this log to be run every 5 years in certain cases. The NPRM was issued in August 1991. Significance: Regulatory Program

Legal Authority: 42 USC 6901/RCRA 1002

CFR Citation: 40 CFR 268

Legal Deadline: Final, Judicial, March 1994.

Abstract: The Hazardous and Solid Waste Amendments of 1984 require EPA to promulgate regulations prohibiting one or more methods of land disposal of hazardous wastes. The rules define treatment standards that must be met before hazardous wastes may be disposed of on land. These standards are based on Best Demonstrated Available Technology (BDAT). The final rule for scheduled waste (those listed as hazardous prior to November 8, 1984) became effective on May 8, 1990. The present rulemaking covers certain wastes identified since the originally scheduled wastes were

brought under the purview of the Land Disposal Restrictions (LDR) (e.g., wood preserving waste, in a number of potliners, and characteristically hazardous mineral processing wastes).

Abstract: EPA conducted a study of fly ash waste, bottom ash waste, slag waste, flue gas emission control waste and other wastes generated by the combustion of coal by electric utility power plants. The study was in response to Section 8002(n) of RCRA and culminated in a Report to Congress on March 8, 1988. EPA must determine within six months after submitting the report, holding public hearings, and allowing for public comment whether to regulate any of these wastes under Subtitle C of RCRA.

Abstract: In response to the shortage of waste landfill capacity, EPA issued in 1989 a strategy for improving the nation's management of municipal solid waste (MSW). As part of this strategy, EPA set a national goal of 25% source reduction and recycling by 1992.

EPA is considering a variety of options which may assist in achieving that goal. The Agency is preparing a notice which discusses these options.

Significance: Agency Priority

Legal Authority: 33 USC 1321 /CWA 311(j)(l)(C)

CFR Citation: 40 CFR 112

Legal Deadline: None

Abstract: Following a major inland zone oil spill with substantial environmental impacts (i.e., Ashland Oil in Floreffe, PA in January, 1988) an interagency task force reviewed the adequacy of regulations concerning the prevention and control of oil spills. The task force recommended a number of options, including an upgrade to the Oil Pollution Prevention Regulation and an inventory of the regulated community. A two-phased regulatory approach is being pursued, Phase I the existing regulation will be clarified to indicate that many widely accepted industry practices that are currently treated as recommended practices by the regulated community henceforth will be considered as required practices. The Phase II regulatory effort recommends other modifications, and will implement new requirements of the Oil Pollution Act of 1990, such as contingency planning for facilities.

Legal Authority: PL 100-556 /Sections 102 to 103; 42 USC 6914(b); 42 USC 6914(1)

CFR Citation: 40 CFR 234

Legal Deadline: Final, Statutory, October 28, 1990.

Abstract: Plastic ring carriers have been found in the marine environment and fish and other wildlife have become entangled in them. Ring carriers were identified as an article of concern in the marine environment in EPA's February 1990 report to Congress on plastics. Congress has determined that degradable carriers should reduce the incidence of entanglement and has directed EPA to develop regulations that ring carriers be made of degradable material unless EPA finds that degradable rings pose more risk than non-degradable rings. EPA may specify degradability time frames and testing methods. A number of States currently require degradable rings. Nearly all rings manufactured in the United States are currently photodegradable.

Abstract: This rule extends the October 26, 1991 financial responsibility compliance date for 14 months. Based on an on-going review of the financial assurance market, EPA was concerned that financial assurance mechanisms were not becoming available rapidly enough to meet the needs of tank owners who must comply by October 26, 1991. Therefore, EPA has decided to modify this compliance date.

Abstract: Under this action, listed wastes that meet the self-implementing de minimis exemption criteria for wastes would no longer be subject to hazardous waste management under Subtitle C of RCRA as listed hazardous wastes. Environmental media that meet the self-implementing exemption criteria for such media would no longer be considered to contain hazardous waste and would no longer be subject to waste management standards. In addition, the action proposes to modify some of the numerical treatment standards listed in Subpart D of CFR, Part 268. These standards are part of the Land Disposal Restrictions (LDR).

Abstract: EPA is considering a rule which would broaden an existing exemption in 40 CFR 261.4(c), currently limited to product or raw material vessels, to all vessels. The result of this change would be a consistent regulation for all vessel operators, both product and non-product. In all cases, hazardous wastes generated on-board ships would not be subject to the RCRA regulations for storage, manifesting, etc., until the waste is removed from the ship. The discharge of any wastes while underway is governed by regulations issued under the provision of the Clean Water Act, Rivers and Harbors Act, Refuse Act, CERCLA/SARA, and others.

The revisions include narrowing the scope of the wastewater listings to those wastewaters that come in contact with process contaminants, replacing the requirement that existing drip pads be impermeable with a numerical performance standard, requiring contingency plans and clean-up of storage yard drippage, and revising the schedule for upgrading existing drip pads to allow 15 years for incorporation of liners and leak detection systems.

CFR Citation: 40 CFR 262.41; 40 CFR 264.75; 40 CFR 271.10; 40 CFR 265.75

Abstract: This amendment may require States to modify their hazardous waste reporting system to collect additional data elements from their large quantity generators and treatment, storage, and disposal (TSDs) facilities. Currently, States are required to collect only minimal data from generators on quantities and types of waste generated and how such waste are managed at TSDs. Such data are not sufficient for EPA to understand in any level of detail the demographics of hazardous waste generation and management in this country, and whether our regulations are having a desired effect. These minimal data requirements were last revised in 1985 with amendments to parts 40 CFR 262.41 (generators) and 40 CFR 264.75 and 40 CFR 265.75 (TSDs).

Abstract: The Agency is receiving information on an increasing number of situations where it is difficult to determine whether specific types of hazardous waste management units meet the definition of a tank, waste pile or surface impoundment. EPA intends to clarify the difference between these units by revising the definitions for these units in 40 CFR260.1. Abstract: This regulation will address a petition for rulemaking submitted by the Boeing Company, requesting that EPA amend several hazardous waste tank system requirements as applied to certain existing sumps. A sump is a type of tank. The petition focuses on those existing sumps that are situated inside of buildings and constructed as an integral part of the building's floor or foundation. The petitioner argues that because of differences in design, construction, and use, these sumps should be regulated independently of other hazardous waste storage/treatment tank systems. The regulation may also propose a modification to the definition of tanks.

Legal Authority: 42 USC 6905 /RCRA 3005(j)(6) and 3004(h)(4)

CFR Citation: 40 CFR 268.5

Legal Deadline: None

Abstract: This regulation will resolve the statutory conflict between RCRA Sections 3005(j)(6) and 3004(h)(4). Section 3005(j)(6) allows four years to retrofit surface impoundments to meet minimum technological requirements for treatment of newly identified wastes. Under the LDR program, EPA is required to establish BDAT standards for the newly identified wastes. If EPA grants a national capacity variance from BDAT treatment standards for the newly identified waste, Section 3004(h)(4) requires that during the variance period the waste may be disposed of in a surface impoundment only if it meets minimum technology requirement standards. We can resolve this conflict by issuing a rule that will allow four years to retrofit surface impoundments for those wastes granted a national capacity variance, unless treatment capacity becomes available sooner. This rule is part of the RCRA land disposal restriction programs and will allow continued management of newly identified hazardous wastes.

Abstract: The Agency has decided to authorize Indian Tribes to implement the Subtitle C program. This regulation will establish the definition of an Indian Tribe and the criteria an Indian Tribe must meet for authorization purposes. Since the Agency also decided that Indian Tribes may be authorized for partial programs (States are not allowed partial State programs under RCRA authorization), the regulation will address this program difference. The regulation will also address Indian capability, including criminal enforcement capability. This regulation fulfills EPA's stated 1984 Indian Policy by ensuring the close involvement of tribal governments in making decisions and managing environmental programs affecting reservation lands.

3697. MINING WASTE MANAGEMENT UNDER RCRA SUBTITLE D

Legal Authority: 42 USC 6941 to 6949 /RCRA 4001-4009

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: Based on the first mining waste Report to Congress submitted 12/31/85, comments on the report, and other available information, EPA has determined that regulation of wastes from the extraction and beneficiation of ores and minerals under Subtitle C of the Resource Conservation and Recovery Act (RCRA) is not warranted at this time (51 FR 24496). Instead, EPA

plans to develop a program for mining waste under Subtitle D of RCRA, working with the States to determine the specific nature of their current mining waste activities and their future plans to administer such programs. EPA will propose a set of criteria for the proper disposal of mining wastes under RCRA Subtitle D authority. EPA will also work with other Federal agencies (e.g., DOI, USGS) to avoid duplication in regulatory efforts. EPA has formed a policy dialogue committee with representatives from states, other Federal agencies, the mining industry, and public interest groups to discuss issues related to Federal program development.

Abstract: Regulations will describe procedures EPA will use to make determinations of adequacy for State Solid Waste permitting programs, as required by Section 4005 of the Solid Waste Disposal Act, as amended (RCRA). This state adequacy determination regulation is critical to the successful implementation of the Revised Criteria. Section 4005(c)(1)(B) requires States to adopt and implement a permit program, or other system of prior approval, within 18 months after the promulgation of revised criteria under Section 4004(a), as required by Section 4010(c). Legal Authority: 42 USC 6903 /RCRA 1004; 42 USC 6921 /RCRA 3001

CFR Citation: 40 CFR 260.22

Legal Deadline: None

Abstract: This amendment as proposed will generally require those who submit delisting petitions for hazardous wastes to provide groundwater monitoring data as part of their petition. The amended regulations will clarify the Agency's existing authority to consider the impact of a petitioned waste on groundwater and deny a petition based on groundwater contamination. EPA is seeking this amendment to clarify its authority to request and consider such data in delisting decisions.

Significance: Agency Priority

Legal Authority: PL 101-549

CFR Citation: 40 CFR 58

Legal Deadline: Final, Statutory, May 15, 1992.

Abstract: Ozone continues to constitute one of the most pervasive national air pollution problems. In order to obtain a more comprehensive and representative data base on ozone and ozone formation, this rule provides for the enhanced monitoring of ozone, oxides of nitrogen, and volatile organic compounds in certain areas designated as nonattainment for ozone. The rule addresses, among other things, the location, minimum number of monitors per area, and the sampling frequency for each class of pollutant. The rule will ensure national consistency and efficiency in the operation of these enhanced monitoring networks.

Abstract: The purpose of this action is to amend EPA's existing new source review regulations, including prevention of significant deterioration, to conform with the new requirements of the Clean Air Act Amendments of 1990. In addition, certain other revisions will be made to improve the clarity of the existing regulatory language. This rulemaking will satisfy obligations under Exhibit B of the settlement agreement in Chemical Manufacturers vs. EPA, No. 79-112 (DC Cir.). The regulations contain procedures for reviewing, permitting, and specifying controls for the construction and modification of major air pollution sources in attainment and nonattainment areas. Several new source review regulations will be affected, including the State implementation requirements for the review of new sources and modifications (40 CFR 51.160-166 and Appendix S). Legal Authority: PL 101-549, Sec 705; 33 USC 1368; EO 11738

CFR Citation: 40 CFR 15

Legal Deadline: None

Abstract: Section 306 of the Clean Air Act, Section 508 of the Clean Water Act, and Executive Order 11738 mandate the exclusion from Federal contracts, grants, or loans of facilities which are the source of criminal violations of those statutes and give EPA discretion to so bar facilities which are the source of continuing or receiving civil violations. Section 705 of the new Clean Air Act Amendments broadens this authority by giving EPA discretion to extend the bar to other facilities owned by a convicted person. The requested action would revise 40 CFR Part 15 to indicate when and whose this new authority will be exercised. At the same time, needed procedural improvements will be incorporated.

Significance: Regulatory Program

Legal Authority: 42 USC 7589

CFR Citation: Not yet determined

Legal Deadline: Final, Statutory, November 1992.

Abstract: The Clean Air Act Amendments of 1990 mandate that EPA establish a pilot program in the State of California to demonstrate the effectiveness of clean-fuel vehicles in controlling air pollution in ozone non-attainment areas. As part of this program, EPA must promulgate regulations establishing a voluntary opt-in program for other States with serious, severe or extreme ozone nonattainment areas.

Significance: Regulatory Program

Legal Authority: 42 USC 7525

CFR Citation: 40 CFR 85; 40 CFR 86

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: The Clean Air Act Amendments of 1990 require EPA to revise the vehicle certification program to incorporate so-called short tests. Short tests are simple screening tests required by many state and local agencies to be performed during motor vehicle inspection/maintenance (I/M) programs to identify vehicles with excessive emissions. Vehicles which cannot pass the short test will not be certified to be sold. In addition, the short test procedures for use in I/M procedures may be amended.

Legal Deadline: Final, Statutory. Reviews due by December 31, 1980 and at 5-year intervals thereafter.

Abstract: EPA is reassessing health and welfare information which has become available since the last revision of the standard. In May 1989 EPA received closure on the scientific and technical adequacy of the ozone staff paper. In order to retain a unified regulatory review package in light of the emerging data base on health and welfare effects associated with longer-term averaging times, EPA is continuing the standard review until such information is published and a decision made on the appropriate standards choice. The major issue is whether the new information will indicate that new standards with longer-term averaging times are required to protect public health and welfare or whether adequate protection is afforded by the current form and averaging time of the standard.

Abstract: The EPA is developing new source performance standards (NSPS) and emission guidelines (EG) for existing sources under Sections 111 and 129 of the Clean Air Act. The NSPS is to reflect the maximum degree of reductions in emissions that have been demonstrated for new units, The EG may be less stringent than the standards for new units. States must submit plans for implementing and enforcing the guidelines. Section 129 requires emission limits be established for particulate matter, sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, and dioxins and dibenzofurans.

Legal Authority: 42 USC 7411 /CAA Section 111

CFR Citation: 40 CFR 60

Legal Deadline: None

Abstract: New source performance standards (NSPS) for secondary lead smelters were promulgated under Section 111 of the Clean Air Act on July 25, 1977. Feedstocks processed by the industry consist primarily of scrap lead-acid batteries. The standards limit the emissions of particulate matter from furnaces used to melt and refine the scrap lead. Since the promulgation of the NSPS, concern over effects of lead exposure in humans has increased substantially. The EPA will review the NSPS to consider the need to address: (1) The particulate matter emission limit; (2) the NSPS coverage over process and area fugitive emissions sources not now covered; and (3) emissions limits for sulfur dioxide.

Legal Authority: Clean Air Act Amendments of 1990, Section 112

CFR Citation: 40 CFR 63

Legal Deadline: None

Abstract: Chromium compounds are among the pollutants listed as hazardous air pollutants in Section 112 of the Clean Air Act Amendments of 1990. Industrial process cooling towers that use chromate-based water treatment programs have been identified by EPA as potentially significant sources of chromium air emissions and, as such, a source category for which national emission standards may be warranted. Emission standards would substantially reduce the amount of chromium discharged to the atmosphere from industrial process cooling towers.

Legal Authority: 42 USC 7607 /CAA 112

Abstract: Section 112(a) of the CAA Amendments of 1990 defines major source as any source that emits 10 tons or more per year of any hazardous air pollutant (HAP) or 25 tons or more per year of any combination of HAP. The tone quantities are inappropriate for radionuclides as very small emissions of radiation may be extremely hazardous. The statute authorizes different criteria to be established for

radionuclides. This rulemaking will establish these criteria.

Significance: Regulatory Program

Legal Authority: Clean Air Act, Section 190

CFR Citation: Not applicable

Legal Deadline: Final, Statutory, May 15, 1992.

Abstract: Section 190 of the Clean Air Act Amendments of 1990 requires EPA to issue technical guidance on reasonably available control measures (RACM), including reasonably available control technology (RACT), and best available control measures (BACM), including control technology for stationary sources in serious PM-10 nonattainment areas, for silvicultural and agricultural burning by May 15, 1992. Note that EPA intends to issue the RACM (including RACT), guidance for fugitive dust emissions, residential wood combustion, and prescribed silvicultural and agricultural burning well before May 15, 1992 in order to provide timely guidance for the development and submittal of those PM-10 SIPs which must include RACM. Such SIPs are due on November 15, 1991 for those PM-10 areas designated nonattainment by operation of law upon enactment of the 1990 amendments. 3777. REVISIONS TO THE STACK HEIGHT REGULATION

Legal Authority: 42 USC 7423/CAA 123

CFR Citation: 40 CFR 51.100

Legal Deadline: None

Abstract: Under the Clean Air Act, emission limitations for sources are generally determined on the basis of local, ground-level concentrations of pollutants. In the absence of laws and/or regulations prohibiting such action, a source could lower the local ground-level ambient pollutant concentrations not only by reducing the amount of pollutants it emits into the air, but also by raising the physical height of its stack or using other dispersion techniques. Section 123, which was added to the CAA by the 1977 Amendments, restricts the manner in which techniques for dispersion of pollutants from a source may be considered in setting emission limitations. The EPA promulgated the current stack height regulation on July 8, 1985. On January 22, 1988, the U.S. Court of Appeals for the D.C. Circuit upheld EPA's regulation except for three provisions which were remanded to the Agency for proceedings consistent with the court's opinion. The purpose of this action is to revise the stack height regulation in accordance with the January 22, 1988 court decision. (cont)

ABSTRACT CONT: The court remanded two grandfathering provisions which allow dispersion credit, including credit for certain stack height increases. The decision also remanded the allowance of dispersion credit for sources with originally designed and constructed merged stacks. The court concluded that exclusion of these groups of sources from the regulation's restrictions was not adequately supported. The EPA is analyzing the court decision to determine whether further support should be offered for the current provisions or whether the regulations should be revised to limit or delete these exclusionary provisions.

Significance: Regulatory Program

Legal Authority: 42 USC/RCRA 3004 and 3007

CFR Citation: 40 CFR 264; 40 CFR 265

Legal Deadline: None

Abstract: Under RCRA, the Agency is required to promulgate standards for monitoring and control of air emissions from hazardous waste treatment, storage, and disposal facilities (TSDF), as necessary to protect human health and environment. Phase I and II of the TSDF project limit organic air emissions as a class at TSDF that are subject to regulation under Subtitle of RCRA. Phase I and Phase II actions are covered under a separate item in this Agenda entitled "Treatment, Storage, and Disposal Facility Area Source Air Emissions -- RCRA Standards". The residual risk values following Phases I and II are higher than the historical RCRA range. The Phase III project will use new data on TSDF to perform site-specific modeling of high risk facilities. Possible outcomes include the following (1) Additional RCRA 3004(n) standards for particular hazardous organic constituents, (2) a guidance document for RCRA permit writers, or (3) no additional action.

Significance: Regulatory Program

Legal Authority: Clean Air Act, Title V

CFR Citation: 40 CFR 70; 40 CFR 71

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: The Clean Air Act Amendments require promulgation of EPA regulations setting forth requirements for States to develop and implement renewable operating permits programs for major stationary sources of air pollutants regulated under the Clean Air Act. Title V of the Clean Air Act Amendments requires (1) operating permit applications from sources to contain a schedule of compliance, (2) State operating permits programs to contain provisions for monitoring and reporting, and (3) the States to have legal authority to issue and enforce permits. The EPA would have review and veto authority over all these provisions and may independently enforce permit requirements.

Significance: Regulatory Program

Legal Authority: 42 USC 7521

CFR Citation: 40 CFR 86

Legal Deadline: None

Abstract: The Clean Air Act Amendments of 1990 require that EPA promulgate regulations setting the heavy-duty engine NOx standards for model year 1998 and beyond at 4.0 g/BHp-hr. This standard for model year 1998 must be established by the end of model year 1993 to allow four model years lead time for manufacturing, research and production as also required by the Clean Air Act. The current NOx standard of 5g/BHp-hr for heavy-duty engines expires in 1994, so this rulemaking will extend the current standard for 1994 to 1997.

Significance: Regulatory Program

Legal Authority: 42 USC 7545

CFR Citation: 40 CFR 80

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: The Clean Air Act Amendments of 1990 require that gasoline sold in the nine worst ozone nonattainment areas be reformulated to be less polluting. All other ozone nonattainment areas may opt-in to this program. EPA may delay opt-in depending on sufficiency of supply and distribution capacity. The amendment also contains provisions requiring EPA to adopt anti-dumping rules for all gasoline sold outside of covered areas. Credit marketing and trading provisions will be decided in the program. The Clean Air Act Amendments contain specific formula requirements for reformulated gasoline as well as performance standards to reduce ozone-forming and toxics emissions.

Significance: Regulatory Program

Legal Authority: 42 USC 7545

3800. PHASEOUT OF LEAD IN GASOLINE AND TEST PROCEDURE FOR LEAD SUBSTITUTES

Significance: Regulatory Program

Legal Authority: 42 USC 7545

CFR Citation: 40 CFR 80

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: Since the late seventies, EPA has had a program to phase-down lead in gasoline. This was a result of evidence that lead from automotive emissions, an air toxic, poses a serious health threat to the public. The Clean Air Act Amendments of 1990 ban the use of leaded gasoline in all motor vehicles beginning in January 1996.

Additionally, it is required that a test procedure for determining lead substitute additives' ability to reduce valve wear and to identify other effects be established along with procedures for lead substitutes additive registration. These latter provisions are intended to assure availability of non-lead additives that can be used to protect valves in older engines designed for leaded fuel.

Significance: Regulatory Program

Legal Authority: 42 USC 7554

CFR Citation: 40 CFR 86

Legal Deadline: Final, Statutory, January 1, 1992. Other, Statutory.

Abstract: In recognition of the contribution of diesel engines to the nation's air quality problems, EPA promulgated emission standards for all categories of on-highway diesel engines, including those for urban buses. In the Clean Air Act Amendments of 1990, Congress revised these standards and added new requirements. The amendments revised the particulate matter (PM) standards for diesel bus engines. Within twelve months of enactment, EPA must promulgate these standards as well as retrofit-rebuild requirements for urban bus engines for cities with populations greater than 750,000.

Significance: Regulatory Program

Legal Authority: Clean Air Act Amendments of 1990, Section 183(a)

CFR Citation: Not applicable

Legal Deadline: Final, Statutory, November 1993.

Abstract: The Clean Air Act Amendments of 1990 require EPA to issue control techniques guidelines (CTG) for 11 source categories within three years of enactment. Currently, CTGs are being developed for chemical manufacturing distillation operations, chemical plant reactor processes, wood furniture manufacturing, coating of plastic parts, offset lithography, industrial wastewater treatment, automobile refinishing, volatile organic liquid storage tanks, use of clean-up solvents at industrial plants, and chemical manufacturing batch processes.

3815. MOTOR VEHICLE TEST PROCEDURES FOR EVAPORATIVE HYDROCARBONS (REVISION)

Significance: Agency Priority

Legal Authority: 42 USC 7521 /CAA 201; 42 USC 7525 /CAA 206

CFR Citation: 40 CFR 86

Legal Deadline: Final, Statutory, May 15, 1991.

Abstract: In conjunction with testing in support of EPA's regulatory effort to control motor vehicle vapor emissions, EPA determined that significant evaporative hydrocarbon emissions can occur when a motor vehicle is running. Such emissions are defined by EPA as "running losses." Testing has shown that running losses can be particularly high on hot summer days which are also conducive to ozone formation. Through this action, EPA will evaluate revisions to the motor vehicle test procedures for evaporative hydrocarbons in order to reduce running losses. EPA published a notice of proposed rulemaking on January 19, 1990; the public comment period was extended to June 5, 1990. A public workshop was held on December 19, 1990. The Clean Air Act Amendments of 1990 mandate a deadline for a final action on these revisions.

Legal Authority: 42 USC 7521 /CAA 201; 42 USC 7525 /CAA 206; 42 USC 7526 /CAA 207

CFR Citation: 40 CFR 86

Legal Deadline: Final, Statutory, May 15, 1992.

Abstract: EPA must develop requirements for passenger cars and light trucks for on-board vehicle diagnostic systems capable of detecting operational malfunctions within the emissions control system. Emission system failures often go undetected or are misdiagnosed resulting in excess emissions of carbon monoxide, hydrocarbons, and oxides of nitrogen. On-board diagnostic systems, which are required in the California vehicle emissions program beginning with the 1988 model year, have the potential for improving air quality through the early detection and proper repair of emission system failures. This regulatory action will be structured to complement existing and future State and local inspection and maintenance programs and has been mandated by the Clean Air Act Amendments of 1990.

Significance: Regulatory Program

Legal Authority: 42 USC 7521 / CAA 202; 42 USC 7525 / CAA 206; Clean Air Act Amendments of 1990

CFR Citation: 40 CFR 86

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: Evaporative hydrocarbons emitted during vehicle refueling contribute to the failure of many urban areas to attain the National Ambient Air Quality Standard for ozone. This action will promulgate regulations controlling refueling emissions on individual vehicles ("onboard" controls) as mandated by the Clean Air Act Amendments of 1990. In addition, many state and local agencies must implement Stage II vapor recovery.

Significance: Regulatory Program

Legal Authority: 42 USC 7521 /CAA 202; Clean Air Act Amendments of 1990

CFR Citation: 40 CFR 86

Legal Deadline: Final, Statutory, November 15, 1991.

Abstract: EPA's current carbon monoxide (CO) emission standards are applicable to the 68 degree to 86 degree Fahrenheit temperature range of the current Federal Test Procedure. Since CO emissions are higher at colder ambient temperatures, and since CO ambient air quality problems occur primarily under ambient temperature conditions less than 68 degrees Fahrenheit, EPA has been mandated under the Clean Air Act Amendments of 1990 to adopt CO emission standards applicable to 20 degrees Fahrenheit.

Legal Authority: 42 USC 7541(b)/CAA 207(b)

CFR Citation: 40 CFR 85

Legal Deadline: None

Abstract: This action would consider an alternative testing procedure to be used in the voluntary aftermarket part certification program for certifying aftermarket parts. Currently only the full Federal Test Procedure and Emission Critical Parameters for Specified Parts are acceptable test procedures for this program. A proposed rulemaking was published on August 8, 1989. Based on the public comments received and further analysis, EPA developed a supplemental notice of proposed rulemaking which was published on January 30, 1991. Analysis of all public comments are complete and work on the final rulemaking is underway.

3820. MOTOR VEHICLE EMISSIONS PERFORMANCE WARRANTY SHORT TESTS

Legal Authority: 42 USC 7541 /CAA 207

CFR Citation: 40 CFR 85

Legal Deadline: None

Abstract: This action will consider allowing alternative dynamometer specifications for an existing loaded-mode short test approved for use in State and local inspection/maintenance programs in conjunction with the federal emissions performance warranty regulations. The alternative specifications the Agency is considering would allow lower loading, perhaps varying by engine size. Such a change could improve overall test effectiveness for identifying excess in-use emissions and correlation with the Federal Test Procedure. A Federal Register notice was published on December 11, 1989 (54 FR 0776) to announce that the comment period was extended to January 10, 1990.

Legal Deadline: Final, Statutory, May 1987.

Abstract: The purpose of this action is to investigate the health impact of non-combustion source air emissions from hazardous waste treatment, storage, and disposal facilities and to develop standards for monitoring and control as needed. Sources include surface impoundments, landfills, waste piles, land treatment operations and wastewater treatment facilities. Pollutants to be considered by such standards would include volatile organic compounds, particulate matter, specific toxic substances, or a combination of these. The mandate for standards development under RCRA is to protect human health and the environment. The Agency has adopted a three-phase approach, with Phase I concerning organic emission leaks and vents, Phase II concerns hazardous waste storage tanks and impoundments, and Phase III deals with residual risks from particular hazardous organic constituents. Phase I and II actions are covered in this item; for Phase III actions, see separate item entitled "Individual Constituent Standards: Phase III of RCRA Air Emission Standards".

Significance: Agency Priority

Legal Authority: 42 USC 9615/CERCLA 115

CFR Citation: 40 CFR 2; 40 CFR 300; 40 CFR 308

Legal Deadline: None

Abstract: Under CERCLA, potentially responsible parties defined under Section 107(a) are liable for the cost of cleanup of Superfund sites. It is Agency policy to pursue potentially responsible parties in court for costs expended if a cleanup settlement is not reached. This rulemaking will define the specific recoverable costs and describe the documentation sufficient to support EPA's cost recovery efforts. This proposed regulation will also address other related aspects, including release of confidential business information in the cost recovery process and the Agency interpretation of certain statute of limitations provisions. The proposed regulation is designed to make the cost recovery process more efficient and less burdensome from a litigation standpoint.

Legal Deadline: Final, Statutory, August 18, 1992.

Abstract: Following a major inland oil spill with substantial environmental impacts (i.e., Ashland Oil in Floreffe, PA in January 1988) an interagency task force reviewed the adequacy of regulations concerning the prevention and control of oil spills. The task force recommended a number of steps, including an upgrade to the Oil Pollution Prevention regulation. A two-phase approach was initiated; this is Phase II. In addition to implementing the recommendations of the task force, this rule will implement the Oil Pollution Act's provisions regarding facility response plans.

Significance: Regulatory Program

Legal Authority: 42 USC 9602 /CERCLA 102

CFR Citation: 40 CFR 302

Legal Deadline: None

Abstract: This rule will designate 226 non-CERCLA extremely hazardous substances (EHS), as defined in Section 302 of SARA Title III, as hazardous substances pursuant to Section 102 of CERCLA. Currently, only releases of those EHSs that are also CERCLA hazardous substances are required to be reported to the National Response Center under CERCLA Section 103. Upon designation, potential confusion concerning the different SARA Title III and CERCLA requirements will be reduced by ensuring consistent procedures for reporting releases of all EHSs.

CFR Citation: 29 CFR 1607

Legal Deadline: None

Abstract: UGESP Recordkeeping Provisions. On March 15, 1983, the Commission voted to review those portions of the recordkeeping provisions of the Guidelines which relate to the maintenance of data necessary to determine adverse impact. Pursuant to that vote, the Commission published in the Federal Register a notice seeking public comment in general and on several specific questions about UGESP recordkeeping. 48 Fed. Reg. 34766 (Aug. 1, 1983). Approximately 45 comments were received. The Commission is considering further action.

Abstract: The purpose of the proposed amendment to 29 CFR 1627.15 is to give those covered by the ADEA more specific information about what they should do if they wish to seek an exemption from any or all of the ADEA's prohibitions. The advantage is that the establishment of a specific procedure will facilitate the processing of exemption requests.

3873. EARLY RETIREMENT PLANS

Significance: Regulatory Program

Legal Authority: 29 USC 628

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The ADEA prohibits discrimination on the basis of age with respect to an employee's compensation, terms, conditions, or privileges of employment. In light of recent amendments to the ADEA and several cases dealing with early retirement, questions have arisen regarding the legality of early retirement plans in general and of specific plans. Since the use of early retirement has expanded greatly in recent years, the Commission deems it appropriate to consider the issuance of regulatory guidance in the area. The ANPRM seeks comment on issues such as voluntariness, plan structuring and eligibility to participate. The Commission is reassessing this project in light of the Supreme Court's decision in Public Employees Retirement System of Ohio v. Betts, 109 S. Ct. 2854 (1989), and the enactment of the Older Workers Benefit Protection Act, Pub. L. 101-433 (Oct. 16, 1990).

3874. POSSIBLE REVISIONS TO INTERPRETATIONS RELATING TO BENEFITS UNDER EMPLOYEE BENEFIT PLANS

Legal Authority: 29 USC 628

CFR Citation: 29 CFR 1625.10

Legal Deadline: None

Abstract: The current interpretive regulations at 29 CFR 1625.10 were framed in 1979. Since that time the ADEA has been amended in a manner that necessitates considering revisions to the regulations, for example, the lifting of the age 70 cap. Accordingly, the Commission requested public comment to determine whether revisions are necessary and, if so, the nature and scope of any such revision. The continuing viability of this project is being assessed in light of the Supreme Court's decision in Public Employees Retirement System of Ohio v. Betts, 109 S. Ct. 2854 (1989), and the enactment of the Older Workers Benefit Protection Act, Pub. L. 101-433 (Oct. 16, 1990).

Significance: Regulatory Program

Legal Authority: 42 USC 2000e et seq Title VII of the Civil Rights Act of 1964

CFR Citation: 29 CFR 1607

Legal Deadline: None

Abstract: On March 15, 1983, the Commission voted to review the recordkeeping portions of the Guidelines. During that review process, several questions arose which pertained to the substantive, non-recordkeeping provisions of the Guidelines. Consequently, the Commission decided to review the substantive portions of the Guidelines. The major substantive areas under review are: 1) the purpose of the Guidelines and whether there is still a need for the Guidelines; 2) the theory of adverse impact and the method of determining when such impact is significant; and 3) how to establish test validity. When the review is completed, the Commission will decide whether any regulatory revisions are needed.

SUPPLEMENTARY INFORMATION: Executive Order 12291 "Federal Regulation" directs each executive agency to adopt procedures to improve existing and future regulations. Publication of an agenda of significant regulations is called for at least semiannually in order to give the public adequate notice of agency rulemaking activities; also, publication of a regulatory flexibility agenda concerning rules likely to have a significant impact on a substantial number of small entities must be published in accordance with 5 U.S.C. 601 *et seq.*

In fulfillment of requirements imposed by the Executive order and 5 U.S.C. 601 *et seq.*, this agenda describes current and projected regulations and regulations which will be under review during the period April 1, 1992, to March 31, 1993. This agenda also contains information on regulations on which action was completed since the last FEMA semiannual agenda, published April 22, 1991, at 56 FR 18076.

Public comment on the agenda, including that by State and local governments, is invited and should be submitted to the Rules Docket Clerk.

The agenda is not limited to major or significant rules and contains as much information as possible concerning all FEMA regulations to be published in the next 12 months except for routine flood elevation determinations, listing of eligible communities under the National Flood Insurance Program, listing of suspended communities and similar designations, and organizational and management matters.

Dated: September 5, 1991.

3890. COMPREHENSIVE COOPERATIVE AGREEMENT (CCA) POLICIES, PROCEDURES, AND ASSOCIATED PROGRAMS

Legal Authority: 50 USC 2286; 50 USC 2251; 42 USC 5121; 42 USC 5151; 42 USC 7701; 42 USC 4001; PL 95-224; PL 96-295; PL 99-499; PL 93-288; PL 95-124; PL 90-488; PL 93-234; PL 90-577; EO 12148

CFR Citation: 44 CFR 305; 44 CFR 302; 44 CFR 360; 44 CFR 301; 5 CFR 900

Legal Deadline: None

Abstract: The comprehensive aspect of the CCA process itself was not created by legislation or even by regulation; Presidential emphasis on grants consolidation and FEMA policy on integrating programs created the CCA. The cooperative agreement aspect of the CCA process is based on PL 95-224, the Federal Grant and Cooperative Agreement Act of 1977. Cooperative agreements are used when stimulating a public purpose (the multiple programs delivered in each CCA are aimed at stimulating public purposes, primarily civil defense). The Federal Civil Defense Act of 1950, as amended, authorizes the major portion of CCA programs and assistance dollars, and is therefore the major legislative authority underpinning the CCA process. Various Civil Preparedness Guides, primarily CPG 1-36 and CPG 1-3 address the CCA process and associated programs. However, a regulation would provide complete notice to States and interested parties and complete the policy and procedural requirements identified by the Office of General Counsel. Specific quantitative estimates cannot be cited.

3916. INDIVIDUAL ASSISTANCE REGULATIONS

Significance: Regulatory Program

Legal Authority: 42 USC 5155

CFR Citation: 44 CFR 206.191

Legal Deadline: None

Abstract: Federal agencies are prohibited from duplicating assistance by section 312 (42 USC 5155) of the Stafford Act. This action deletes subparagraph (d)(2)(i) of 44 CFR 206.191, and thus excludes emergency assistance from the American Red Cross (ARC) from being considered duplicative of assistance from any other disaster assistance program. The cited paragraph is being removed because it has been determined that the information sharing process is inequitable, staff-intensive for no real benefit to the Federal Government (since ARC emergency aid is minimal and given for expendable items), and unable to be implemented on a nationwide basis for all voluntary agencies' emergency assistance.

CFR Citation: 41 CFR 101-8.2

Abstract: The General Services Administration proposes this regulation to implement all of the above cited Federal laws. These statutes prohibit discrimination, in whole or in part, so that no person in the United States shall on the grounds of race, color, national origin, or sex be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program activity receiving Federal assistance from the General Services Administration. In addition, the objectives of the regulation are to streamline certain administrative procedural requirements by consolidating prohibitions of

discrimination into one regulation and to make requirements clear and convenient for applicants and recipients to comply with, as well as making the regulation manageable for GSA to administer.

3961. FEDERAL PROPERTY MANAGEMENT REGULATION PART 101-17, ASSIGNMENT AND UTILIZATION OF SPACE

Significance: Agency Priority

Legal Authority: 40 USC 481; 40 USC 601; 7 USC 1924; 40 USC 490; 40 USC 531; 42 USC 3601; 42 USC 4321; 42 USC 4201; EO 12072; EO 12411; EO 12512; PL 100-678

CFR Citation: 41 CFR 101-17

Legal Deadline: None

Abstract: A new temporary amendment to FPMR 101-17, Assignment and Utilization of Space, will improve the space delivery process for Federal agencies by making it more efficient, more timely, and better able to deliver quality space that supports agency mission needs. The new temporary FPMR will: implement a new space assignment process that emphasizes client service; establish a new, comprehensive move policy that clarifies roles and responsibilities; revise the GSA location policy to be more responsive to agency mission needs; revise the standard alterations, which agencies receive upon an initial move, to recognize modern office needs; and revise the space classification definitions to eliminate ambiguity. These changes will result in a more efficient space delivery process and improve the overall efficiency of Government operations. The current FPMR Temporary Regulation D-73 is outdated and is not comprehensive in its coverage of the process for acquisition and assignment of Federal space. The new temporary FPMR will correct these problems.

4018. UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS

Legal Authority: 44 USC 2104; 44 USC 2504

CFR Citation: 36 CFR 1207

Legal Deadline: None

Abstract: This action proposes a common rule updating and replacing agencies' implementation of OMB Circular A-110 with a single, government-wide common rule establishing consistency and uniformity among Federal agencies in the administration of grants and cooperative agreements to institutions of higher education, hospitals, other nonprofit organizations, and commercial or for-profit entities. This result is achieved by amending the common rule issued by the agencies on March 11, 1988, to similarly update and replace implementation of OMB Circular A-102. The provisions of the common rule are largely drawn from the existing departmental rules issued by the several agencies which in the past developed a single, comprehensive rule implementing the circulars. This proposed common rule contains fiscal and administrative requirements applicable to grantees.

This regulation notifies interested institutions of this program and provides some basic information including where to obtain the necessary technical criteria.

Abstract: This proposed regulation implements Title VI of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs and activities, with respect to programs and activities receiving Federal financial assistance from the National Endowment for the Humanities.

Programs and activities receiving Federal financial assistance from the National Endowment for the Humanities are currently covered by a regulation implementing Title VI that was issued by the National Foundation on the Arts and the Humanities in 1973 (45 CFR 1110). The proposed rule will remove NEH programs from the coverage of the earlier rule and replace it with a new part applicable only to NEH-assisted programs and activities. Programs and activities assisted by the National Endowment for the Arts remain covered under the existing regulation.

CFR Citation: 45 CFR 650

Abstract: The Bayh-Dole Act (35 USC 200 et seq) was amended by Title V of PL 98-620 (98 Stat. 3364, 3368). The Department of Commerce has prepared a governmentwide implementing regulation. The Foundation's patents regulation (45 CFR 650) conforms to it. Because the revision to the NSF patents regulation will merely echo a governmentwide regulation on which the public will have had an opportunity to comment, the Foundation expects that the revision will be published as a final rule. No additional costs will be imposed on the public as a result of the revision.

Additional Information: The notable changes to be made in the revision of the NSF patents regulation will be: elimination of restrictions on the licensing of NSF-supported inventions by nonprofit organizations, including universities; modification of the criteria and procedures for determining that "exceptional circumstances" warrant restricting a grantee's right to retain principal patent rights to its employees' NSF-supported inventions; and elimination of the Foundation's authority to waive the government license and "march-in" rights in awards not subject to the Bayh-Dole Act. All these changes are required by amendments to the Bayh-Dole Act.

Federal Regulations; OMB Circulars and Policy Letters Included in the Semiannual Agenda of Upcoming Activities

AGENCY: Office of Management and Budget.

ACTION: Publication of semiannual agenda.

SUMMARY: The Office of Management and Budget (OMB) is publishing its semiannual agenda of upcoming activities on OMB Circulars and Office of Federal Procurement Policy Letters (OFPP Policy Letters). This action is in accordance with OMB's internal procedures for implementing Executive Order No. 12291. OMB policy guidelines are issued under authority derived from several sources including: Subtitles I, II, and V of title 31, United States Code, Executive Order No. 11541, and other specific authority as cited. The agenda includes actions on issuances which are not guidelines but which are of public interest. While it is presented in the standard Governmentwide format of prerule, proposed rule, and final rule stages, the entries are not rules.

OMB Circulars and OFPP Policy Letters are policy guidelines that communicate Governmentwide policy of a continuing nature. For purposes of this agenda, we have excluded directives that outline procedures to be followed in connection with the President's budget and legislative programs and directives that affect only the internal functions, management, or personnel of Federal agencies.

FOR FURTHER INFORMATION CONTACT: See agency person listed for each entry in the agenda, c/o Office of Management and Budget, Washington, DC 20503. On the overall agenda, contact Darrell Johnson, (202) 395-7250, at the above address.

Dated: September 17, 1991.

Darrell A. Johnson,

Assistant Director for Administration.

Legal Authority: PL 100-418, Sec 7002

CFR Citation: None

Legal Deadline: Other, Statutory. OFPP presented a report to Congress on December 9, 1990, which included policy guidance on factors to be used in making determinations of country of origin.

Abstract: The Buy American Act (the Act) was enacted in 1933 to ensure Federal agencies gave domestic products priority in competition for government contracts. The Act provides that, unless it is inconsistent with the public interest or unreasonably costly, all materials and supplies purchased by any department of the Federal Government, and all materials and supplies furnished by contractors doing work for the Federal Government, be produced within the jurisdictional limits of the United States. In 1988, the Act was amended by several sections of Title VII of PL 100-418. Among other things, the 1988 amendments, directed the Administrator of Federal Procurement Policy to "conduct an assessment of the rules currently used this Act for making determinations of country of origin and alternatives to such rules." In conducting this assessment, the Administrator was directed to identify and evaluate reasonable alternative rules of origin, including one which requires that a determination be made on the basis of total cost.

4189. RULES FOR MEASUREMENT OF VESSELS

Significance: Agency Priority

Legal Authority: PL 96-70, Sec 1601

CFR Citation: 35 CFR 135

Legal Deadline: None

Abstract: In July 1982, 48 nations, representing more than 80 percent of world shipping, began implementing a new uniform method for tonnage determination in accordance with the International Convention on Tonnage Measurement of Ships, 1969. Final implementation is scheduled for July 1994. The present Panama Canal measurement system is based upon the old national tonnage measurement system. The Panama Canal Commission is currently studying the possibility of adapting its tonnage measurement system to one which is compatible with the 1969 Convention. This would eliminate the need for vessels to be measured twice, once under the new system and again under the old system for Panama Canal assessment purposes. While no timetable for rulemaking has been established, tentative plans are to target any possible change to the Panama Canal measurement rules to the July 1994 final implementation of the 1969 Convention.

The purpose for publishing this agenda is to give notice of any regulatory activity by the Agency in order to allow the public an opportunity to participate in the rulemaking process.

FOR FURTHER INFORMATION CONTACT: The public is encouraged to contact the agency official listed for the particular agenda item. For other information concerning Peace Corps' regulations or this semiannual agenda, contact Mr. Daniel Bosco, Assistant General Counsel, Peace Corps, 1990 K Street NW., Washington, DC 20526, (202) 606-3114.

SUPPLEMENTARY INFORMATION: In accordance with Executive Order 12291 "Federal Regulation" and the Regulatory Flexibility Act (5 U.S.C. 605), executive agencies are required to publish in the **Federal Register** semiannual regulatory agendas in April and October of each year. The regulations being considered by the Peace Corps are not "major" rules within the meaning of E.O. 12291, and no Regulatory Impact Analysis is required. Agenda of Regulations Under Development

AGENCY: Pension Benefit Guaranty Corporation (PBGC).

ACTION: Agenda of regulations.

SUMMARY: This document sets forth the Pension Benefit Guaranty Corporation's regulatory agenda issued under Executive Order 12291 and the Regulatory Flexibility Act. The agenda lists regulations that are currently under development or that PBGC expects to have under development during the next 12 months. The effect of this agenda is to advise the public of PBGC's current and future regulatory activities.

ADDRESSES: Office of the General Counsel, Code 22500, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: For further information on the agenda in general, contact Harold J. Ashner, Assistant General Counsel, Office of the General Counsel, (202) 778-8850. For information about a specific regulation project listed on the agenda, contact the person designated in the agenda for that regulation.

SUPPLEMENTARY INFORMATION: Under the President's Order on Federal Regulation, Executive Order 12291, 46 FR 13193, each agency is required to publish in April and October an agenda of regulations currently or soon to be under development. The Executive order requires that the agenda also include those currently effective regulations that are being reviewed by the Agency pursuant to the Executive order. The Regulatory Flexibility Act, Public Law 98-354, 5 U.S.C. 601, has a similar agenda requirement. Under that law, the agenda must list any regulation that is likely to have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has issued guidelines prescribing the form and content of the regulatory agenda. Under those guidelines, the agenda must list all regulatory activities being conducted or reviewed in the next 12 months and provide certain specified information on each regulation. All of the items on this agenda are current or projected rulemakings.

4200. ANNUITY CONTRACTS DISTRIBUTED BY TERMINATING PLANS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b); 29 USC 1341(b)

CFR Citation: 29 CFR 2617

Legal Deadline: None

Abstract: ERISA section 4041(b) requires terminating plans to provide benefits that are payable in annuity form by purchasing and distributing to plan participants (or beneficiaries) irrevocable commitments from an insurer to pay the annuity benefits. Once the final distribution of assets in accordance with section 4041(b) is completed, PBGC's guarantee under ERISA section 4022 is extinguished. Under ERISA section 4041(b), the only specific requirement dealing with irrevocable commitments distributed upon plan termination is that they be purchased from a licensed insurance company. (Such purchases are, of course, subject generally to the fiduciary provisions of Title I of ERISA.) During the past 1 1/2 years, publicity about financial problems within the insurance industry, and, specifically, about the serious problems of a few insurers, has sparked concerns about the security of pension annuities that are being, or will be, paid by an insurer pursuant to an irrevocable commitment. Although since ERISA's enactment, no retiree has lost his or her pension because of an insurance company insolvency, PBGC (with the Department of Labor) has been studying this issue. (cont)

Additional Information: ABSTRACT CONT: As part of this ongoing study, PBGC issued an ANPRM, in order to solicit comments and suggestions from the public on the following two broad issues: (1) Are current or future retirees, who are (or will be) receiving their benefits from an insurance company pursuant to the insurer's irrevocable commitments, at risk of losing some (or all) of their promised benefits because of the insurer's financial inability to pay the full benefits? (2) If such risk does exist, or can reasonably be expected to exist in the future, what actions, either Federal or nonfederal, can be taken to reduce this risk with respect to plans terminating under Title IV? After reviewing the public comments in response to this ANPRM, as well as the other information available to it, PBGC will decide whether to proceed with this rulemaking by issuing an NPRM.

4201. PLAN RULES FOR REDUCTION OR WAIVER OF COMPLETE WITHDRAWAL LIABILITY

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1387(b)

CFR Citation: 29 CFR 2647 (Amendment)

Legal Deadline: None

Abstract: Under section 4207(a) of ERISA, the PBGC has issued a regulation (29 CFR Part 2647) providing for the reduction or waiver of an employer's liability for complete withdrawal upon the employer's resumption of participation under the plan from which it withdrew. The statute also requires the PBGC to prescribe procedures and standards under which multiemployer plans may adopt their own rules abating complete withdrawal liability upon an employer's return to the plan (section 4207(b)).

The purpose of letting plans adopt their own abatement rules is obvious: a specific rule adopted by a plan may well work better under the facts and circumstances of that particular plan than the broad rules adopted by the PBGC. This regulation will permit a plan to fashion the rules it needs to encourage the return of withdrawn employers, while at the same time protecting the plan from the loss of withdrawal liability payments without a compensating resumption of contributions to the plan by a formerly withdrawn employer. The PBGC is unable to (cont)

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1306; 29 USC 1307

CFR Citation: 29 CFR 2610

Legal Deadline: None

Abstract: Under sections 4006 and 4007 of ERISA, the PBGC has issued its regulation governing the payment of premiums for pension plans subject to Title IV of ERISA (29 CFR Part 2610). PBGC studies of ways to simplify premium calculation and filing and to improve premium processing and accounting by PBGC have yielded suggestions for changes in that regulation, and the PBGC is considering amending the regulation to implement any such changes that it may ultimately find worthwhile. Changes now under review relate mainly to filing due dates, treatment of short plan years, simplification of the alternative calculation method, and premium payment requirements for large plans (including what plans are considered large plans for this purpose). The purpose of the changes would be primarily to simplify the premium payment system for plans and the PBGC.

CFR Citation: 29 CFR 2619; 29 CFR 2676

Legal Deadline: None

Abstract: Section 4062 of ERISA provides that when a single-employer pension plan terminates with unfunded benefit liabilities, any contributing sponsor of the plan and any member of the contributing sponsor's controlled group shall be liable to the PBGC for the amount of unfunded benefit liabilities as of the plan termination date (and interest thereon). Current 29 CFR 2619 prescribes the rules, including the mortality and interest rate assumptions, to be used to value benefits. The interest and mortality assumptions are selected so that the calculated benefit values will be in line with the market costs for providing the benefits. Similarly, current 29 CFR 2676 prescribes the rules for valuing benefits under multiemployer plans following a mass withdrawal of employers. The PBGC intends to propose amending 29 CFR 2619: (1) to update its mortality assumptions to reflect recent actuarial practice, (2) to uncouple the regulation's administrative expense ("loading") assumptions from its interest assumptions, and (3) to replace the interest rate structure with one based on the length of time between the valuation date and (cont)

The PBGC intends at the same time to propose amending 29 CFR 2676, governing valuation of benefits in multiemployer plans following mass withdrawal, so as to adopt the same mortality, interest, and loading assumptions as would the modified single-employer regulation. This change will result in simplification of calculations under the multiemployer regulation as well as greater consistency of annuity valuations between the two programs. The PBGC anticipates that, for most plans, the amendments would not significantly affect the valuations produced.

Legal Authority: 29 USC 1302(b)(3); 29 USC 1322; 29 USC 1342

CFR Citation: 29 CFR 2624

Legal Deadline: None

Abstract: When the PBGC assumes trusteeship of a terminated pension plan pursuant to sections 4041 and 4042 of ERISA, it pays benefits to participants pursuant to plan provisions and section 4022 of ERISA. Many of the rules and procedures for benefit payments, while of interest to participants, are inappropriate for inclusion in a regulation. The PBGC already provides much of this information to participants in other appropriate forms, such as letters and pamphlets, and will continue to do so. However, rules governing certain aspects of benefit payments are more appropriately established by regulation (or otherwise addressed through a Federal Register issuance). This regulation will enable the PBGC to process and administer PBGC-trusteed plans more efficiently with resultant cost savings by filling gaps in the rules and otherwise clarifying matters that had been handled on a case-by-case basis in the past.

4205. PAYMENTS BY PBGC OF UNFUNDED NONGUARANTEED BENEFITS

Significance: Regulatory Program

Legal Authority: 29 USC 1302(b)(3); 29 USC 1322(c)

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The Pension Protection Act repealed ERISA sections 4049 and 4062(c). Those provisions established new employer liability to plan participants and beneficiaries in the event of a distress termination or involuntary termination by the PBGC of a plan without sufficient assets to pay all benefit commitments; the section 4049 trust was the vehicle for collecting and distributing these liability amounts. This system proved flawed in several respects, however, and Congress therefore created a new scheme by which to channel employer liability recoveries to plan participants and beneficiaries, amended ERISA section 4022(c).

Under section 4022(c), participants no longer have a direct claim for employer liability. Instead, the PBGC's claim covers both its shortfall (unfunded guaranteed benefits) and participants' losses (unfunded benefit liabilities in excess of guaranteed benefits). In turn, the PBGC is to pay a portion of its employer liability recovery to participants and beneficiaries. The amount to be paid is based on the PBGC "recovery ratio" (as defined in amended sec. 4022(c)(3)).(cont)
